Re. MV2014F0013 MV2014L8-0006

Dear Mr. Morse,

This letter is to confirm that the Nahzq Dehé Dene Band (NDDB) supports Canadian Zinc Corporation's request for an environmental assessment with respect to its application for an all-season road from the Liard River to the Prairie Creek mine site.

This road would travel through and impact NDDB traditional lands, potentially affecting wildlife, waterways, and harvesting patterns. While acknowledging the potential economic benefits of an all season road and its contribution to the viability of the mine, NDDB believes that an environmental assessment would provide the opportunity for potential impacts to be fully identified and for detailed mitigation measures to be put into place to protect NDDB traditional interests.

NDDB is prepared to participate fully in an EA associated with this project.

Yours truly,

Peter Redvers
NDDB Lands and Resources Advisor
