Subject: Overdue Revisions - the Groundwater Monitoring Program, the Environmental Protection Plan, and the Operations and Maintenance Plan
Date: Monday, December 7, 2020 9:31:00 AM

Good morning Shawn,

On October 8, 2020, the Mackenzie Valley Land and Water Board (the Board) reviewed the Carter Industries Ltd.'s 2018 and 2019 Annual Water Licence Reports (2018 and 2019 Annual Reports) for the Hay River Soil and Water Treatment Facility. At that time, the Board directed Carter Industries Ltd. to update and resubmit, for review and approval, the Groundwater Monitoring Program (Appendix D of the Waste Management Plan), the Environmental Protection Plan, and the Operations and Maintenance Plan to reflect the current status of the groundwater wells, and to discuss appropriate Action Levels and response plans for groundwater exceedances that have been reported in the Annual Reports. These revisions were due to be submitted to **the Board by December 3, 2020.**

The Board's decision on the Annual Reports and direction letter including comments and recommendations provided during the review can be found [here](#).

Please provide an update on the status of these plans.
