Subject: RE: Follow-up

Good afternoon Amanda,

There is issues occurring with the internet and phone lines here in Simpson today.

Thank you for the earlier email with the supplied MSDS's. I will forward them over to the Regulatory Officer with the Mackenzie Land and Water Board associated with the permit.

I have no concerns with the use of the Drilling/Mud Additives as long as all fluids are disposed of at an approved disposal facility. Please provide the documentation to support the disposal when available.

Thank you,

Mársi | Kinanaskomitin | Thank you | Merci | Hą́ı' | Quana | Qujannamiik | Quyanainni | Máhsı | Máhsı | Mahsi

Subject: Follow-up

Hi Kyle,

I am having trouble calling the Fort Simpson GNWT office for some reason. There is limited cell phone coverage where we are working, so I will try again later today.

I just want to assure you that we are only using bentonite in the section of the hole where we are casing anyway, and therefore cementing in place, so not in the part of the hole where we will be installing a monitoring well. We are containerizing all drilling fluids and will contact a disposal company in Fort Nelson.

Thank you,
Amanda
