**Subject:** RE: GMRP- MV2007L8-0031 MV2019X007 LUI Inspector Notification\_ Water overflowing Baker Creek 20220131

Good Morning,

No work has occurred relating to management of Baker Creek overflow conditions in the last week (May 2 to 6) . Given the fairly mild freshet to date and the lowered Creek levels there is currently no mitigation work planned for the coming weeks. As such Parsons will no longer be submitting the weekly summary of mitigation activities. Should any mitigation work resume Parsons will resume submission of the weekly summary report.

Regards,

Caroline
