---

Hi Jayda,

Thank you for the report. I have spoken with the Project Geologists and we will undertake the action.,

Reclamation work at the N204 drill site will be completed in the spring/early summer of 2023 or earlier where possible. This work will include the following activities:

1. The rutting at N204-22-PP-223 and N204-22-PP-034 will be back bladed prior to spreading brush and overburden over the site
2. Installation of a wooden marker at 60° 56' 48.8" N and 114° 3' 12.8" W
3. At all N204 sites, as appropriate, rollback brush and overburden over the drill sites (trees and brush pushed into the standing timber to be pulled out, trees bucked and made to lie flat)
4. Cut off steel marker N204-22-PP-146 during the upcoming winter program and install wooden marker if needed.
5. Also, at N204-22-PP-146, trees pushed into the standing timber will be cut down and laid flat

Regards

Andrew
