---

Thank you Dave,

I will post the New Discovery Mine Structure Description and Construction Plan and this authorization to the Public Registry. In line with Part E, condition 7 of MV2020L2-0002, unless otherwise authorized in writing by an Inspector, a minimum of 90 days prior to the commencement of Construction of all structures, excluding Engineered Structures, intended to contain, withhold, divert, or retain Water or Wastes, the Licensee shall submit to the Board, for approval, a **Structure Description and Construction Plan**. The Plan shall be in accordance with the requirements of Schedule 3, Condition 1. The Licensee shall not commence Construction of the structure(s) prior to Board approval of the Plan.

Board staff consider this note the Inspector's authorization to proceed with sump construction without additional Board authorizations. That said, any work initiated must align with currently approved Management and Monitoring Plans and must be consistent with the terms and conditions of Licence MV2020L2-0002 and Permit MV2020C0003.

Board staff would like to remind NDM that resubmission and approval of the Waste Rock Management and Geochemical Characterization and Monitoring Plan and the Groundwater and Water Management Plan are required prior to commencement of mining activities.

Thank you,

Shannon Allerston, MA, MSc

**Subject:** RE: Sixty North Structure Design and Construction Plan

Hello Shannon,

Based on our discussion yesterday; as per the definition of engineered structures and sumps in the water license, the sump is not considered an engineered structure and the plans submitted to the board for public review will not need to be circulated.

Sorry for the confusion, the definition that I was looking at for engineered structure was in the previous license.

If you have any additional questions, please let me know.

Thanks,

Dave

David-Scott McQuinn

Hey David,  
Do you have a minute to talk about this submission from NDM?  
If so, can you please call my cell, 446-0871.  
Thanks,  
Shannon
