Enbridge Pipelines
Norman Wells, NT
XOE OVO

Attention: Jim Boyle
Re: KP 160 Authorizations

Dear Jim,

Please accept this letter as Inspector approval to utilize the access road from the Mackenzie River to KP 160 for the upcoming integrity dig (from the map you provided). However, Enbridge will be responsible to ensure full compliance with all permitted conditions under the **MV2020P0006** Land Use Permit (LUP).

Furthermore, at the very first sign of rutting, the overland travel must cease. Enbridge will also be responsible to contact our office 48 hours prior to any work commencing (this includes utilizing this road).

This approval is only for the use of the access road with approved equipment in the LUP **MV2020P0006** and for no other unpermitted activities. You may have to do some minor brushing along the access road please contact the Sahtu office to discuss options.

Moreover, Inspector believes it may be beneficial for Enbridge to include this access in their next LUP or renewal and maintain this access for future needs.

Sincerely,

Jonathan Gillingham
A/Regional Superintendent
Manager, Resource Management
Department of Lands – Sahtu Region

CC: Mackenzie Land and Water Board

Trevor Bremner – Regional Superintendent – Sahtu Region

Christopher Wasylshyn-Ondris – Resource Management Officer II – Sahtu Region
