Dear Matthew Miller:

**Sediment and Erosion Control Management Plan Version 1 – Interim Approval  
Northwest Territories Power Corporation – Taltson Facility Upgrades**

The Mackenzie Valley Land and Water Board (MVLWB or the Board) met on June 10, 2021 to review your Sediment and Erosion Control Management Plan, Version 1, which was submitted under Condition 19 of Land Use Permit MV2020X0004

The Board approves the Plan as an interim submission and requires that the Northwest Territories Power Corporation (NTPC) resubmit the Sediment and Erosion Control Management Plan, in accordance with comments made during this review (see Table 1 attached). Please include a conformity table in the Plan. This Plan should be resubmitted by **July 10, 2021**, and will be considered approved upon receipt of this information and written confirmation of conformity from Board staff.

As part of their submission, NTPC indicated that work involving the surge tank will be delayed until 2027 and subsequently did not include the associated requirements of Condition 19.a) v. in relation to the surge tank. Should NTPC determine that the surge tank work will be conducted under Permit MV2020X0004, NTPC will be required to resubmit the Sediment and Erosion Control Plan in accordance with Condition 19. If you have any questions or concerns, please contact Andrew Wheeler at (867) 766 7467.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Mavis Cli-Michaud".

Mavis Cli-Michaud  
MVLWB, Chair
