Hi Shannon and Andy,

Lands and I completed an inspection of the Taltson Dam on July 29, 2021. No major issues were noted, but I wanted to let you both know that Matt indicated that the Dam Overhaul project is on hold, so any work related to this is delayed. This includes administrative items as well including planned permit and licence amendments. This explains why we haven't heard anything in a while. Just wanted to give you both a heads up on this.

Regards,

Wendy

This is the email I was remembering. Andy might be able to fill you in a bit better than me!

Hope this helps a little.

Shannon

Hello Andy, Shannon and Katie,

The updated Sediment and Erosion Control Plan will be submitted by July 23, 2021. Apologies for the delay in response any work related to the Taltson Overhaul, which the majority of the scope of LUP MV2020X0004 is related too, has been put on hold at the organizational level. Given that the updates are relatively minor we will be able to complete this scope of work despite the company wide hold off.

As such the previously discussed LUP amendment/WL modification for the water intake is on hold pending further direction on the overhaul project. Once more information on timelines is available we will provide an update. Any permits or licences will be amended and updated as required as well.

Thanks for your time and let me know if there is any information I can provide at this time.

Cheers,

Matt
