Good Morning,

Thanks for the meeting this morning. As mentioned, we have now completed the three(3) cut & caps located at J-04, I-10 and L-29. Wells were cut & capped at 2.5 m depth and signs were installed 1 m north of well centers. All in all things went fairly smoothly and overall Innovative Well Abandonment did a good job for us. M-31 well operations are well under way. We have perforated and cement squeezed 2 of the 4 identified intervals, and the bubbling seen next to the wellhead has stopped. We are working towards finishing the last 2 intervals to ensure all potential gas sources have been squeezed off. In the Cameron Hill field the focus has now shifted on accessing the two quad bridges for pipeline riser removals. The snow cats made it to both bridges on a first pass and we will continue to build up the access to allow for an excavator to access the bridges. That's about all for this week's update.

Here are some photos of this week's operations (cut & caps):

Thanks,
Mike
