## Revision History

- Version 1 of the Engagement Plan was submitted with the original application for MV2013L2-0005/ MV2013C0023 on January 8, 2014
- Version 1.1 was submitted on May 26, 2014 as per requirement Part B, item 8 of MV2013L2-0005 and condition 72 of MV2013C0023. Version 1.1 was approved by the MVLWB on September 11, 2014
- Version 2.0 was updated as follows for submission with amendment applications for MV2013L2-0005 and MV2013C0023:
  - Some minor wording changes to reflect ongoing amendment applications and formatting changes to be consistent with other submitted plans
  - An updated Engagement Log has been attached in Appendix 2
- Version 2.1 was updated to include engagement in November 2015
- Version 3.0 was updated with engagement in 2016
- Version 3.1 was updated with engagement in 2017
  - Some minor wording changes to reflect initiation of newsletter, plain language reports, and community bulletin posts.
- Version 3.2 was updated as follows:
  - Minor adjustments to text to better reflect activities (Section 2).
  - Contact information for KDI has been updated (Section 4)
  - Some typos have been corrected (Section 5).
  - Contact information has been updated (Appendix 1).
  - The engagement record was updated to include activities from 2018 to 2021 (Appendix 2).
- Version 4.0 was updated as follows:
  - Adjustments to text and figures to incorporate activities pertaining to the Kennady North Regional Exploration Project and to update contact information.
  - The engagement record was updated to include activities from the first ~nine months of 2022.
- Version 4.1 was updated as follows:
  - Adjustments to text, tables, and Appendix 1 to incorporate Weghàà Eleyatits'eedi, per KDI's commitment during the Water Licence and Land Use Permit process for the Regional Exploration Permit.
  - The engagement record was updated to include activities to date.
- Version 5.0 (this document) has been updated for inclusion in an application to renew and amend Type B Water Licence MV2013L2-0015 and replace Land Use Permit MV2016C0030. Updates include:
  - Updates to body of plan and engagement log (Appendix 2) to reflect engagement through October 16th, 2023
  - Update of the Introduction (Section 1) to be consistent with other plans being submitted
  - Update of contact information
  - Extension of Appendix 1 (which was added in Version 4.1 per commitment to incorporate Weghàà Eleyatits'eedi) to include all Indigenous groups routinely engaged with.

# 1 INTRODUCTION

Kennady Diamonds Inc. (KDI or the Company) is currently exploring for diamondiferous kimberlites in the Kennady North area, which is located in the Northwest Territories approximately 280 kilometers (km) east-northeast of Yellowknife, immediately adjacent to the Gahcho Kué Mine (Figure 1). KDI's interests in the Kennady North area consist of 99 mineral claims and 30 mineral leases totalling ~113,437 ha of land (Figure 2). KDI is a wholly owned subsidiary of Mountain Province Diamonds Inc. (MPVD). MPVD holds a 49% interest in the Gahcho Kué Mine Joint Venture (GKJV) with De Beers Group, who holds 51% interest in the GKJV and is the operating partner.

The Engagement Plan (the "Plan") is intended to provide a framework for open communication and sharing of information with interested parties throughout all stages of Project activities.

## 1.1 Project Description

### 1.1.1 Foundational Exploration

Currently, exploration activities in the Kennady North Project (the Project) area consist of conducting foundational exploration assessment work on claims and mineral leases held by the company, including prospecting, bedrock and surficial mapping, geological, geophysical, and geochemical surveys, diamond drilling, small- and large- reverse circulation drilling, and trenching to delineate kimberlite targets and to help determine economic grade. Samples are sorted and sent off site for analysis or processing. At its maximum scope, foundational exploration drilling activities may consist of a combination of up to seven (7) drills of any type (i.e., five (5) diamond or small reverse circulation (RC) drills and two (2) large RC drills) in use at any one time.

Exploration activities are conducted from the existing Bob and/or Kelvin camps, which host approximately 50 to 150 people, typically operate up to 10 months of the year, and are accessible by air and seasonal ice road. Winter access occurs either by air from Yellowknife, Bob Camp, or Kelvin Camp, with drill mobilization and demobilization via the existing Tibbitt to Contwoyto Winter Road, the Gahcho Kué spur road, and spur roads to Bob and Kelvin camps. Additional winter trails, including ice bridges and roads, may be used to move heavy- and light-duty vehicles, equipment, and personnel around the Project site in the winter. Summer access occurs by fixed wing on floats or helicopter from Yellowknife to Bob or Kelvin camps.

A small number of remote fuel caches are in place to support drilling and helicopter activity, with fuel stored in drums or equivalent. Temporary, remote fuel caches may also be established in areas proximal to active drilling areas. Field sampling and drilling sites are progressively reclaimed.

## 1.1.2 Advanced Exploration

In September 2016, KDI submitted Land Use Permit and Water Licence applications to the MVLWB to obtain authorizations for advanced exploration activities, which focus on obtaining a larger bulk kimberlite sample that can be used to assess the economic value of the mineral reserve (see Kennady Diamonds - Advanced Exploration Project Description<sup>1</sup>). The Advanced Exploration activities that were authorized in 2016 included the following:

- increase in extraction from 1,200 to 5,000 t/a bulk sample;
- construction and operation of an underground decline to access the Kelvin and Faraday kimberlite deposits for bulk sampling;
- construction and operation of a multi-purpose laydown and camp area (approximately 5 ha);
- construction and operation of a pioneer all-season airstrip (approximately 1,650 m by 45 m) to accommodate larger aircraft for workers and resupply;
- construction and operation of limited all-season roads linking the winter road to the laydown, airstrip, declines, dock, and drilling locations at the Faraday and Kelvin deposits;
- construction and operation of a new 140-person mobile camp on the laydown area and consolidation of existing Kelvin Camp modules with this new camp (Kelvin Camp Expansion);
- quarrying and/or the use of cut and fill to obtain material for roads, laydown area and airstrip as necessary;
- increased use of explosives (including mixing and storage) for quarrying and construction of the decline;
- installation and operation of a portable Bulk Sample Processing Plant (< 100 t/day); and
- increase to the size and quantity of various types of equipment (e.g., trucks, loaders, underground equipment) as well as the amount of fuel storage allowed on site to accommodate the proposed activities.

Advanced exploration activities have not yet commenced but will be required to advance mine planning for known kimberlites in the coming years.

## 1.2 Plan Objective and Scope

The Company is committed to actively engaging with the Tłı̨ch̨ Government, Akaitcho Territory Government<sup>2</sup>, North Slave Métis Alliance, and Northwest Territories Métis Nation<sup>3</sup> and to ongoing engagement and communications with the Government of the Northwest Territories (GNWT), the Government of Canada, and the Mackenzie Valley Land and Water Board (MVLWB or the “Board”). The Company also engages with interested nearby communities, regulatory agencies, and Non-Governmental Organizations (NGOs) to both provide awareness and address concerns raised as a result of its exploration activities.

This Engagement Plan (the “Plan”) is intended to provide a framework for open communication and sharing of information with interested parties throughout all stages of Project activities. The Plan was first approved by

<sup>2</sup> The Akaitcho Dene First Nations are comprised of the Yellowknives Dene First Nation, Łutselk'e Dene First Nation, Deninu K'ue First Nation and the Akaitcho Interim Measures Agreement Implementation Office (AIMAIO).

the MVLWB in 2014. In 2023, the Plan was updated in collaboration with the Tłıchq Government to ensure consistency with the Tłıchq Government’s guidance on engagement for proponents, as outlined in Weghàà Ełeyatıts’eedi (Tłıchq Government 2022).<sup>4</sup>

KDI commits to reviewing the plan annually and in advance of any new Water Licence or Land Use Permit applications, renewals, or amendments, and to making any necessary revisions to reflect changes in engagement activities, changes in project scope, discussions with Indigenous governments regarding engagement practices or procedures, or as directed by the MVLWB. Revisions are submitted to the MVLWB for approval. In the event that the scope of the Projects change in a significant way, KDI will reevaluate the existing Plan, engage with relevant parties to discuss the changes, and work towards development of a more comprehensive Plan as needed.

The Engagement Log (Appendix 2) has been updated in this version of the Plan.

## **2 ENGAGEMENT PLAN**

The KNP is being conducted on both Tłıchq and Akaitcho Dene lands. The area has also been identified as a traditional land use area by the NWT Métis Nation and North Slave Métis Alliance (NSMA). Some of KDI's mineral claims are overlapped by a Land Withdrawal Order added to the South Slave Land Withdrawal Order post staking. Developing open and transparent communications during the life of both the permits and licences will provide more clarity and assistance for the process of engaging all parties. KDI recognizes the need for different methods of engagement for different parties based upon their communications preferences and requirements. The Indigenous groups with which KDI routinely engages are:

- Tłıchq Government
- Akaitcho Territory Government
  - Yellowknives Dene First Nation
  - Łutselk’e Dene First Nation
  - Deninu K’ue First Nation
- Northwest Territories Métis Nation
  - Fort Resolution Métis Government
  - Hay River Métis Government Council
  - Fort Smith Métis Council
- North Slave Métis Alliance

Engagement of affected parties and the public in general will help build cooperative working relationships and support for the Project. It will also serve to bring forward important issues, minimize project delays, and allow

KDI to become better informed on issues affecting Indigenous people in the region and the sensitivity of land and water use operations.

The benefits of the Plan are relevant to both the proponent (KDI) and potentially affected parties. The Plan provides a structure for communications with the various governments and organizations that will be impacted throughout the life of the Projects. The Plan, as described in this document, defines the ongoing commitment of KDI to the various groups. KDI will provide opportunities to discuss exploration-related activities associated with the Projects with affected groups, including – and especially – anything that changes the scope of the Projects.

The formal engagement and communication process will include the following:

- communications that ensure adequate time for sharing and review of information;
- open two-way communications with Indigenous governments and organizations to share information and to maintain an open and collaborative dialogue;
- the use of plain language when describing technical aspects of programs; and
- implementation of the Engagement Plan with follow-up reporting and review.

Types of engagement that will be conducted under the auspices of the Plan will include the following:

- face to face meetings (in person or virtual);
- electronic correspondence (email and letters);
- community newsletters, plain language reports, community bulletin posts, or fact sheets; and
- community meetings.

Face to face meetings will allow for direct discussion of specific issues, initiatives, and opportunities to address any concerns. Electronic correspondence will allow KDI to communicate with potentially affected parties and obtain their input in order to address Project-related issues. Community newsletters, plain language reports, community bulletin posts, and fact sheets will be used to provide Project updates or clarify information about the Project in plain language, providing an opportunity for KDI to inform community members, obtain feedback, and address any concerns that might arise. Community meetings will provide an opportunity for KDI to present information about the Project to members of the public and provide members of the public with an opportunity to ask questions and make comments about the Project in person. KDI's goal is to provide firsthand information that will allow potentially affected parties to be informed about and provide input on Project-related activities and future plans.

Details on Engagement triggers, contacts, and methods are provided in Appendix 1.

### **3 ENGAGEMENT PROCESS**

#### **Preparation**

- Project Description
- Identification of Potential Issues and Affected Parties
- Initiate Dialogue

### **Communication**

- Informative
- Open
- Engaging
- Active Participation

### **Implementation**

- Put Plan into Action
- Receive Feedback and Ideas

### **Review and Revision**

- Evaluation and Assessment
- Modify Plan

If KDI finds itself in a situation where there is limited or no activity, there will be less engagement as there will be little news to share. Any change in the scope of activity would be communicated directly to the affected parties and recommendations sought on how to engage related groups with ongoing communications. This will allow KDI to maintain good two-way communications with affected parties, establish constructive dialogue, and ultimately provide benefit to KDI and all affected parties.

KDI's corporate point of contact with respect to engagement initiatives is MPVD's Chief Technical and Sustainability Officer, Matthew MacPhail. Environmental, permitting, and engagement support is provided by Katsky Venter of RainCoast Environmental, to whom related questions can be directed. KDI's contact for technical aspects of the exploration program is Aurora Geosciences Ltd. (AGL), the primary contractor. Technical questions may be directed to Gary Vivian, M.Sc., P.Geol. (AGL President) or Chris Hrkac, B.Sc. (AGL Senior Project Manager). Engagement assistance is also provided by AGL. Mr. MacPhail, Ms. Venter, Mr. Vivian, and Mr. Hrkac can be reached by email at [m.macphail@mountainprovince.com](mailto:m.macphail@mountainprovince.com), [katsky.venter@gmail.com](mailto:katsky.venter@gmail.com), [gary.vivian@aurorageosciences.com](mailto:gary.vivian@aurorageosciences.com), and [chris.hrkac@aurorageosciences.com](mailto:chris.hrkac@aurorageosciences.com), respectively.

## 4 SUMMARY OF PROJECT MODIFICATIONS RESULTING FROM ENGAGEMENT

This section highlights recommendations resulting from engagement on the Projects and how these are addressed.

Issue	Proposed Resolution
Concern with dust dispersion.	KDI will employ dust suppression measures.
Request for access to business and employment opportunities.	KDI's operators to ensure contracting and employment opportunities are provided to local communities.
Impact Benefit Agreements (IBA) to be discussed should project proceed to mining. Requests for Exploration Agreements to be developed.	KDI aims for engagement and completion of IBA prior to mining permit applications are filed. Exploration Agreements have been or are being developed with requesting communities.
Seeking support from KDI on community wellness projects and programs.	KDI has supported and continues to evaluate contributions to community wellness projects under their Community Investment Program.
Request for KDI to develop to exceed industry best practices in its management plans.	KDI has worked hard on producing best-in-class management plans for its permitting applications and is committed to meeting and exceeding commitments made in these plans.
General concerns about project effects on wildlife, water, and tundra and that project development could further prevent wildlife recovery.	KDI conducted a comprehensive environmental screening analysis to identify its potential contribution to environmental impacts and develop mitigation measures to minimize or eliminate project effects.
Initiate Traditional Knowledge (TK) studies and monitoring should the project progress to the next stage of development.	KDI is committed to initiating TK and other environmental baseline studies after Advanced Exploration permitting and before mining permit applications are filed.

---

Should project advance to mining proposal, suggestion that KDI consider sequencing to optimize community economic development.

KDI will consider sequencing of project to align with community capacity in addition to project financing, logistics, and permitting, and other business criteria to maximize viability of the project to northern communities and KDI shareholders.

---

Request for KDI to share wildlife data with the GNWT.

KDI will share wildlife data with the GNWT where feasible.

---

Request for KDI to plug drill holes once drilling is complete.

KDI will continue to plug or cement exploration drill holes.

---

2023-01-20	Phone; Email	TG	April Hayward (MPVD/KDI) Grace Mackenzie (TG) Bret Wheler (TG) Jessica Pacunayen (TG) Violet Camsell-Blondin (TG)	Engagement Plan update following REP issuance; incorporation of Weghàà Eleyatits'eedi: Tłıcho, Government Guidelines for Proponents of Development	AH left message and contact information with front desk on Jan. 20, Feb. 02, and Feb. 06. AH sent follow-up email to GM Feb. 06. AH and GM spoke on the phone on Feb. 10. AH provided a copy of the proposed changes to the Engagement Plan same day. GM indicated that she will review with the Resource Management Group and provide feedback from the group to AH in a virtual meeting on Feb. 17. Meeting was postponed to Feb. 20 at the request of GM. On Feb. 20, GM cancelled meeting and indicated by email that BW's team would be in touch. AH phoned BW on Feb. 21 to discuss timeline for TG review. BW indicated that TG would return comments within the next couple of days and that KDI should be able to meet the March 1 MVLWB deadline. On Feb 27, AH emailed to enquire whether TG might require more time. BW responded that comments would be provided same day. JP provided minor edits and a 2-page summary of additional engagement triggers and contacts for KDI's knowledge, which KDI incorporated into the Plan. AH confirmed receipt by email same day. KDI subsequently

					submitted the updated Engagement Plan to the MVLWB on Feb 28, 2023.
2023-03-06	Email, Letter, Newsletter	AIMAIO	April Hayward (MPVD/KDI) Stephanie Poole (AIMAIO)	KDI provided a written project update and invited parties to meet with KDI to discuss upcoming activities and opportunities. The update included notification of KDI's intention to apply to Renew its existing AEP Type B Water Licence and to replace its existing AEP Type A Land Use Permit in 2023. A Community Newsletter was attached for distribution.	SP confirmed receipt of the engagement letter and newsletter and indicated that she had passed the information on to appropriate AKDFN staff. SP enquired whether KDI had signed Exploration Agreements with LKDFN, DKFN, or YKDFN and whether the provisions of the agreement are being followed and reported. AH responded March 7.

2021-12-21	Virtual Meeting	NSMA	April Hayward (KDI), Sharleen Hamm (AGL)  Jess Hurtubise (NSMA)	Provide a project and corporate update, discussed the upcoming LUP extension, and future plans including the possible submission of a Type A LUP and Water Licence Application for claims staked in 2021 and 2022.	AH provided a presentation which was followed by open discussion. JH expressed the need for a clear understanding of the relationship between Gahcho Kué (GK) and the Kennady North Project should the Project move forward to large-scale mining operations. JH indicated that it is important to NSMA that attempts are made to synergize GK and KNP environmental monitoring and reporting to reduce overall workload.

					<p>JH and AH agreed that it would make sense for KDI to meet with NHX. JH will raise the issue at the next Governance Committee meeting.</p> <p>JH enquired about changes to traffic if the Project advances to full-scale operations. AH indicated that mine planning remains in very early stages and that mobile equipment needs are not yet clear. AH promised to keep NSMA apprised as mine planning moves forward.</p> <p>JH indicated that NSMA Vice President Marc Whitford is interested in business opportunities. AH and JH agreed to arrange a meeting between MW and MPVD's new CEO in the New Year.</p> <p>JH requested a copy of the presentation. AH provided by email same day.</p> <p>JH requested a table listing what is included (scope and area) under current LUP and what will be addressed in future applications associated with newly staked claims. AH provided a table by email on Dec 22.</p>
