Subject: EOR Review and Approval - Sewage Tank in TCA 1
C&M Contractor Camp, Cantung Mine Site, NT

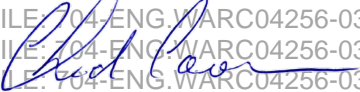

As per the request from Alvarez & Marsal Canada to comment on the installation of an underground septic holding tank within the TCA 1 footprint that is required to support the operations of the Care and Maintenance (C&M) Contractor's camp facilities, Tetra Tech Canada Inc. has reviewed the provided documents and has the following comments.

There are no concerns with installing the underground septic holding tank within TCA 1 as this will not impact the stability of the perimeter containment berms.

I cannot comment on the impacts to the performance of the existing cover nor what ground conditions will be encountered once the C&M Contractor breaks ground through the cover into the underlying tailings.

We trust this letter meets your present requirements. If you have any questions or comments, please contact the undersigned.

Respectfully submitted,
Tetra Tech Canada Inc.
