Yellowknife NT X1A 2L9

Sent by email

Dear Muhammad Abu Bakar,

**Re: Government of the Northwest Territories – Department of Infrastructure – Issuance Package – Water Licence MV2024L8-0003 – Miscellaneous – NWT Highway #4 km 7.94 - km 10.18**

The Mackenzie Valley Land and Water Board (Board) met on March 14, 2024, and considered the Application Package from Government of the Northwest Territories – Department of Infrastructure for Water Licence (Licence) MV2024L8-0003 for the Placement of fill (Project) in accordance with the *Waters Act*.

The Board has approved Licence MV2024L8-0003 (attached) for a term of five years, effective April 2, 2024, and expiring April 1, 2029. The Licence is supported by the Board's Reasons for Decision. These documents are posted to the Board's Public Registry.<sup>1</sup>

#### Submission Requirements

Please refer to Attachment A of the Licence for a complete summary and timetable of submissions required for the Licence. The Board's decisions on submissions that were considered in conjunction with the Application Package are set out below.

---

<sup>1</sup> See MVLWB Online Registry [www.mvlwb.com](http://www.mvlwb.com) for [MV2024L8-0003](#).

## Management Plans – Approved

The Board has approved the following Plans:

Condition Number and Title	Title of Plan (Version)
Part B, Condition 18, ENGAGEMENT PLAN	Engagement Plan (V1.0) <sup>2</sup>
Part F, Condition 4, WASTE MANAGEMENT PLAN	Waste Management Plan (V1.0) <sup>3</sup>
Part H, Condition 2, SPILL CONTINGENCY PLAN	Spill Contingency Plan (V1.0) <sup>4</sup>
Part F, Condition 3, SEDIMENT AND EROSION CONTROL PLAN	Sediment and Erosion Control Plan (V1.0) <sup>5</sup>

When these Plans are next revised and submitted, the Plans must include the changes detailed in the Reasons for Decision.

### Inspectors

The Inspectors referred to in the Licence can be contacted at the regional GNWT-ECC offices.<sup>6</sup>

### Licence Processes and Additional Information

Sections 5 and 6 of the Land and Water Board (LWB) *Guide to the Water Licensing Process*<sup>7</sup> (Guide) contain detailed information on licence enforcement and potential post-issuance processes, such as amendments to conditions, and assignment to another company. Please be familiar with these sections of the Guide and reach out to Board staff with any questions about LWB processes related to the Licence.

Full cooperation of GNWT-INF is anticipated and appreciated. Please contact Tyree Mullaney via [email](#) or at (867) 766-7464 with any questions or concerns regarding this letter.

Yours sincerely,

Tanya MacIntosh

Chair, Mackenzie Valley Land and Water Board

[Attachment B](#): Revision History Table

## Part A: Scope and Defined Terms

Scope:	Condition Title
1. This Licence entitles the Licensee to use Water and deposit Waste for miscellaneous activities for the fill placement project. The scope of this Licence includes the following: a) Deposit of fill; and b) Progressive Reclamation and associated Closure and Reclamation activities.	SCOPE
2. The scope of the Project is as described in the Preliminary Screening Determination for MV2024L8-0003, dated March 14, 2024.	SCOPE – PRELIMINARY SCREENING
3. This Licence is issued subject to the conditions contained herein with respect to the use of Water and the Deposit of Waste in any Waters or in any place under any conditions where such Waste or any other Waste that results from the Deposit of such Waste may enter any Waters. Any change made to the <i>Waters Act</i> and/or Waters Regulations that affects licence conditions and defined terms will be deemed to have amended this Licence.	LEGISLATION SUBJECT TO CHANGE
4. Compliance with this Licence does not relieve the Licensee from responsibility for compliance with the requirements of any applicable federal, territorial, or municipal legislation.	LEGISLATIVE COMPLIANCE

## Defined Terms:<sup>1</sup>

**Board** – the Mackenzie Valley Land and Water Board established under subsection 99(1) of the *Mackenzie Valley Resource Management Act*.

**Closure and Reclamation** – the process and activities that facilitate the return of areas affected by the Project to viable and, wherever practicable, self-sustaining ecosystems that are compatible with a healthy environment and human activities.

**Construction** – any activities undertaken during any phase of the Project to construct, build, upgrade, or replace any structures, facilities, or components of, or associated with, the Project.

**Deposit of Waste** – a deposit of Waste in any Water or in any other place under conditions in which the Waste, or any other Waste that results from the deposit of that Waste, may enter any Waters.

**Engagement Plan** – a document, developed in accordance with the LWB *Engagement and Consultation Policy* and the *Engagement Guidelines for Applicants and Holders of Water Licences and Land Use Permits*, that clearly describes how, when, and which engagement activities will occur with an affected party during the life of the Project.

**Groundwater** – as defined in section 1 of the Waters Regulations: all water in a zone of saturation below the land surface, regardless of its origin.

**Inspector** – an Inspector designated by the Minister under subsection 65(1) of the *Waters Act*.

**Licensee** – the holder of this Licence.

**Minister** – the Minister of the Government of the Northwest Territories (GNWT) – Environment and Climate Change.

**Ordinary High-Water Mark** – the usual or average level to which a Watercourse rises at its highest point and remains for sufficient time so as to change the characteristics of the land. In flowing Watercourses (rivers, streams), this refers to an active channel/bank-full level, which is often the 1:2-year flood flow return level. In inland lakes, wetlands or marine environments, it refers to those parts of the Watercourse bed and banks that are frequently flooded by Water so as to leave a mark on the land and where the natural vegetation changes from predominantly aquatic vegetation to terrestrial vegetation (excepting Water tolerant species). For reservoirs, this refers to normal high operating levels (full supply level).

**Progressive Reclamation** – Closure and Reclamation activities conducted during the operating phase of the Project.

---

<sup>1</sup> Defined terms are capitalized throughout the License, including when used in other definitions.

## Defined Terms:<sup>1</sup>

**Project** – the undertaking described in Part A, Conditions 1 and 2.

**Receiving Environment** – the natural environment that, directly or indirectly, receives any Waste from the Project.

**Receiving Water** – the Water in the Receiving Environment that receives any direct or indirect Deposit of Waste from the Project.

**Remediation** – the removal, reduction, or neutralization of substances, Wastes, or hazardous materials from a site in order to prevent or minimize any adverse effects on the environment and public safety, now or in the future.

**Runoff** – the overland flow of Water or Wastewater that occurs when precipitation, meltwater, or other Water is not absorbed by the land.

**Seepage** – any Water or Waste that drains, passes through, or escapes from any structure designed to contain, withhold, divert, or retain Water or Waste.

**Solid Waste Disposal Facilities** – the area(s) and structures designated to contain solid Waste.

**Spill Contingency Plan** – a document developed for the Project in accordance with INAC's *Guidelines for Spill Contingency Planning*.

**Traditional Knowledge** – the cumulative, collective body of knowledge, experience and values built up by a group of people through generations of living in close contact with nature. It builds upon the historic experiences of a people and adapts to social, economic, environmental, spiritual, and political change.

**Unauthorized Release** – a release to the Receiving Environment of any Water or Waste not authorized under this Licence.

**Waste** – as defined in section 1 of the *Waters Act*:

- a) a substance that, if added to water, would degrade or alter or form part of a process of degradation or alteration of the quality of the water to an extent that is detrimental to its use by people or by an animal, fish or plant, or
- b) water that contains a substance in such a quantity or concentration, or that has been so treated, processed or changed, by heat or other means, that it would, if added to other water, degrade or alter or form part of a process of degradation or alteration of the quality of that water to the extent described in paragraph (a), and includes
- c) a substance or water that, for the purposes of the *Canada Water Act*, is deemed to be waste,
- d) a substance or class of substances prescribed by regulations made under subparagraph 63(1)(b)(i),
- e) water that contains a substance or class of substances in a quantity or concentration that is equal to or greater than a quantity or concentration prescribed in respect of that substance or class of substances by regulations made under subparagraph 63(1)(b)(ii), and

## Defined Terms:<sup>1</sup>

- f) water that has been subjected to a treatment, process or change prescribed by regulations made under subparagraph 63(1)(b)(iii).

**Waste Management Plan** – a document, developed in accordance with the MVLWB *Guidelines for Developing a Waste Management Plan*, that describes the methods of Waste management for the Project from Waste generation to final disposal.

**Wastewater** – any Water that is generated by Project activities or originates on-site, and which contains Waste, and may include, but is not limited to, Runoff, Seepage, Sewage, Minewater, and Effluent.

**Water** – as defined in section 1 of the *Waters Act*: water under the administration and control of the Commissioner, whether in a liquid or frozen state, on or below the surface of land.

**Watercourse** – as defined in section 1 of the Waters Regulations: a natural watercourse, body of Water or Water supply, whether usually containing Water or not, and includes, but is not limited to, Groundwater, springs, swamps, and gulches.

**Water Management Area** – a geographical area of the Northwest Territories established by section 2 and Schedule A of the Waters Regulations.

**Waters Regulations** – the regulations proclaimed pursuant to section 63 of the *Waters Act*.

**Water Use** – as defined in section 1 of the *Waters Act*: a direct or indirect use of any kind, including, but not limited to,

- a) a diversion or obstruction of waters,
- b) an alteration of the flow of waters, and
- c) an alteration of the bed or banks of a river, stream, lake or other body of water, whether or not the body of water is seasonal, but does not include a use connected with shipping activities that are governed by the *Canada Shipping Act, 2001*.

## Schedule 1: Annual Water Licence Report

### Condition

1. The **Annual Water Licence Report** referred to in Part B, Condition 17 of this Licence shall include, but not be limited to, the following information about activities conducted during the previous calendar year
  - a) A brief summary of Project activities;
  - b) An updated Project schedule;
  - c) A summary of engagement activities conducted in accordance with the approved **Engagement Plan**, referred to in Part B, Condition 18 of this Licence;
  - d) A summary of how Traditional Knowledge was incorporated into decision making;
  - e) A summary of Construction activities conducted in accordance with Part E of this Licence;
  - f) A summary of major maintenance activities conducted in accordance with this Licence;
  - g) A summary of activities conducted in accordance with the approved **Waste Management Plan**, referred to in Part F, Condition 4 of this Licence, including:
    - i. A summary of approved updates or changes to the process or facilities required for the management of Waste;
    - ii. Monthly and annual quantities, in cubic metres, of waste disposed of, by location; and
    - iii. Monthly and annual quantities of disposed of, by location.
  - h) A summary of activities conducted in accordance with the approved **Sedimentation and Erosion Control Plan**, referred to in Part F, Condition 3 of this Licence, including:
    - i. A summary of approved updates or changes to the process or facilities required for the management of erosion and sedimentation;
    - ii. A description of any erosion susceptible areas encountered;
    - iii. A summary of activities undertaken to prevent or mitigate erosion; and
    - iv. A report of the performance of mitigations applied to each area.
  - i) A summary of the results and any actions taken as a result of the following inspections:
    - i. Inspections conducted to fulfill this Licence; and
    - ii. Inspections conducted under the Sediment and Erosion Control Plan, required under Part F of this Licence;
  - j) A summary of activities conducted in accordance with the approved **Spill Contingency Plan**, referred to in Part H, Condition 2 of this Licence, including:
    - i. A list and description for all Spills and Unauthorized Releases, including the date, NWT spill number, volume, location, summary of the circumstances and follow-up actions taken, and status (i.e., open or closed), in accordance with the reporting requirements in Part H, Condition 3 of this Licence; and
    - ii. An outline of any spill training carried out.

**Condition**

- k) A summary of any Closure and Reclamation work completed;
- l) A list of any non-compliance(s) with the conditions of this Licence or any directive from the Board pursuant to the conditions of this Licence;
- m) A summary of actions taken to address concerns, non-conformances, or deficiencies in any reports filed by an Inspector; and
- n) Any other details requested by the Board by November 30 of the year being reported.

**Signed on behalf of the Mackenzie Valley Land and Water Board**

**7.0 Conclusion.....14**

On March 14, 2024, the Mackenzie Valley Land and Water Board (MVLWB or Board) met and considered the Application made by Government of the Northwest Territories – Department of Infrastructure (GNWT-INF) (Applicant) to the Board on January 26, 2024, for Water Licence (Licence) MV2024L8-0003 for the deposit of waste for the Placement of Fill (the Project) along the NWT Highway 4. After reviewing the Application and the evidence gathered during the regulatory proceeding, the Board has made the following decisions:

- 1) To issue Water Licence MV2024L8-0003 for a term of five years;
- 2) To approve Version 1.0 of the Waste Management Plan;
- 3) To approve Version 1.0 of the Spill Contingency Plan;
- 4) To approve Version 1.0 of the Engagement Plan; and
- 5) To approve Version 1.0 of the Sediment and Erosion Control Plan.

These Reasons for Decision set out the Board’s regulatory process for the Application and rationale for decisions regarding the Licence. A summary of the Application and the main issues identified during the proceeding is provided in sections [2.0](#) and [3.0](#) below, followed by an outline of the regulatory process for the Application in [section 4.0](#). [Section 5.0](#) describes how the applicable legislative requirements have been met. The Board’s decisions and supporting rationale are set out in [section 6.0](#) for the Licence.

## 1.0 List of Defined Terms and Acronyms

Applicant/Licensee/	Government of the Northwest Territories – Department of Infrastructure

Project	the undertaking as described in Part A of the Licence
Standard Licence Conditions	LWB <a href="#">Standard Water Licence Conditions Template</a>

<sup>1</sup> To access the Distribution List, see the LWBs’ Online Review System for GNWT-INF – [Placement of Fill – Feb1 24](#).

## **2.0 Summary of Application**

On January 26, 2024, the Applicant submitted application for a new Licence MV2024L8-0003 (the Application).<sup>2</sup> The Application is for the placement of fill to bring the road up to proper grade. These activities are located outside of federal areas within the Akaitcho Region.

In making its decision and preparing these Reasons for Decision, the Board has reviewed and considered:

- 1) The Application as submitted by the Applicant for the Project;
- 2) The evidence and submissions received by the Board from the Applicant in relation to the Licence; and
- 3) The comments and recommendations, evidence, and submissions received by the Board from Parties during the regulatory proceeding.

## **3.0 Main Issues Raised During the Regulatory Proceeding**

These Reasons for Decision focus primarily on the following key issues raised during the regulatory proceeding. Issues that were resolved by Parties to the Board's satisfaction during the proceeding are not addressed in detail in these Reasons.

## **4.0 Regulatory Process**

On January 26, 2024, the Applicant submitted the Application, which subsequently deemed complete and circulated to the Distribution List for public review on the Online Review System (ORS).<sup>3</sup> Public notice of the Application was published in *News North* during the week of February 5, 2024 to fulfill paragraph 43(1)(a) of the [Waters Act](#).<sup>4</sup>

As part of the public review, Board staff requested comments and recommendations to assist with the Board's preliminary screening determination. Board staff also circulated a draft Licence for review with the Application to allow all Parties the opportunity to comment on the specific wording of the draft conditions.

By February 22, 2024, the Board received comments and recommendations regarding the Application from the Department of Fisheries and Oceans. GNWT-INF did not provide a response as none was required.

On March 14, 2024, the Board met and made its preliminary screening determination for the Project.<sup>5</sup>

<sup>2</sup> See MVLWB Online Registry ([www.mvlwb.com](http://www.mvlwb.com)) for GNWT-INF – [Water Licence Application – Jan26\\_24](#).

<sup>3</sup> See MVLWB Online Review System for GNWT-INF – [Placement of Fill – February 1, 2024](#).

<sup>4</sup> See MVLWB Online Registry for GNWT-INF – [Notice of Application – Feb5\\_24](#).

<sup>5</sup> See MVLWB Online Registry for GNWT - INF – [Preliminary Screening Determination and RFD – Mar 19\\_24](#).

On March 14, 2024, the Board met to make decisions regarding the Application. These decisions and related reasons are described in sections [5.0](#), and [6.0](#), below.

## **5.0 Legislative Requirements Related to Licence Issuance**

This Project is subject to the [MVRMA](#), the [Waters Act](#), and the [Waters Regulations](#) with respect to licensing, because it is located outside of federal areas.

As per the [Waters Regulations](#), the proposed deposit of waste for this Project requires a licence. Accordingly, the Board has jurisdiction to issue the Licence as per subsection 60(1.1) and section 102 of the [MVRMA](#).

In conducting its regulatory process for the Application (as described in sections [3.0](#) and [4.0](#) above), the Board has ensured that section 62 of the [MVRMA](#) and all applicable legislative requirements have been satisfied as outlined in the subsections below. The Board has considered the people and users of the land and water in the Mackenzie Valley, and any Traditional Knowledge and scientific information that was made available to the Board during the regulatory proceeding, as per section 60.1 of the [MVRMA](#). The consideration of information provided to the Board is discussed in detail below and in sections [6.0](#).

### **5.1 Consultation, Engagement, and Public Notice**

As per paragraph 60.1(a) of the [MVRMA](#), in exercising its authority, the Board must consider the importance of conservation to the well-being and way of life of Indigenous peoples of Canada, specifically those to whom section 35 of the *Constitution Act*, 1982, applies and who use an area of the Mackenzie Valley. Accordingly, the Board works with applicants, affected parties (including Indigenous governments and organizations), and other parties (such as other boards and regulators) to ensure that potential impacts of proposed projects, including impacts on rights under section 35, are understood and carefully considered before decisions are made with respect to the issuance of permits and licences.

The Board's requirements for engagement are set out in the LWB [Engagement and Consultation Policy](#) and [Engagement Guidelines for Applicants and Holders of Water Licences and Land Use Permits](#).<sup>6</sup> The Policy and Guidelines were developed to ensure that the Board's obligations for achieving meaningful consultation (as set out by land claims and applicable legislation) with all affected parties, including Indigenous groups in the Mackenzie Valley, are met and engagement and consultation results clearly articulated. Engagement commenced December 14, 2023 and concluded January 12, 2024. In accordance with the Policy and Guidelines, the Applicant's engagement efforts and proposed procedures are detailed in the Engagement Record and Plan (Version 1.0), respectively,<sup>7</sup> submitted with the Application. The Board has approved the Applicant's Engagement Plan (Version 1.0), and the Board's reasons for this decision are

---

<sup>6</sup> See MVLWB Policies and Guidelines webpage to access the LWB [Engagement and Consultation Policy](#) and [Engagement Guidelines for Applicants and Holders of Water Licences and Land Use Permits](#).

<sup>7</sup> See MVLWB Online Registry for GNWT-INF – [Engagement Record V1.0 – Jan26 24](#) and GNW-INF – [Engagement Plan V1.0 – Jan26 24](#).

described below in [section 6.3](#). Following issuance, the Applicant must continue engagement efforts as outlined in the Engagement Plan, once approved, and as required in the Licence.

The Application was posted to the Board's Public Registry and distributed through the ORS. As the Project is located in the Akaitcho Region, the appropriate organizations, governments, First Nations, and Indigenous organizations were included in the Distribution List.<sup>8</sup> The Distribution List was used throughout this proceeding to circulate submissions, information, and updates relevant to the proceeding; the List was updated if needed, and (if requested) individuals with specific interests in the Project were added. More information about the proceeding for the Application is provided above in [section 4.0](#).

In accordance with sections 63 and 64 of the [MVRMA](#), the Board is satisfied that notice of and access to copies of the Application was provided, and that a reasonable amount of time was given to communities, First Nations, and the public to participate in this proceeding and make submissions to the Board.

In accordance with the [Northwest Territory Métis Nation Interim Measures Agreement](#),<sup>9</sup> the Northwest Territory Métis Nation was notified of the Application through the ORS distribution. The Board did not receive any evidence from the Northwest Territory Métis Nation during the proceeding.

In accordance with the Minister of Indian Affairs and Northern Development's 2004 [Policy Direction to the MVLWB regarding the Akaitcho Territory Dene First Nations](#), the Akaitcho Dene First Nation was notified of the Application through the ORS distribution. The Board did not receive any evidence from the Akaitcho Dene First Nation member nations during the proceeding.

In accordance with the Minister of Indian Affairs and Northern Development's 2003 [Policy Direction to the MVLWB Regarding Consultations with the Manitoba Denesuline](#),<sup>10</sup> the Ghotelnene K'odtjneh Dene (formerly Manitoba Denesuline) were notified of the Application through the ORS distribution. The Board did not receive any evidence from the Ghotelnene K'odtjneh Dene during the proceeding.

In accordance with the Minister of Indian Affairs and Northern Development's 2003 [Policy Direction to the MVLWB Regarding Consultations with the Saskatchewan Athabasca Denesuline](#),<sup>11</sup> the Saskatchewan Denesuline were notified of the Application through the ORS distribution. The Board did not receive any evidence from the Saskatchewan Denesuline during the proceeding.

<sup>10</sup> See MVLWB Land Claims, IMAs, and Land Use Plans webpage to access the [Policy Direction to the MVLWB Regarding Consultations with the Manitoba Denesuline](#).

<sup>11</sup> See MVLWB Land Claims, IMAs, and Land Use Plans webpage to access the [Policy Direction to the MVLWB Regarding Consultations with the Saskatchewan Athabasca Denesuline](#).

## 5.2 Land Use Plan Conformity

As per section 61 of the [MVRMA](#), where an approved Land Use Plan applies, the Board must confirm conformity with the Land Use Plan before issuing a permit or licence.

No approved Land Use Plans apply in the Project area.

## 5.3 Water Use Fees

The Applicant is exempt from paying fees for the right to use water as per section 3 of the [Waters Act](#).

## 5.4 Existing Licences

During the time period established in the Notice of Application, no licensees or applicants contacted the Board to identify potential effects from the Project on other projects, and there are no other applicants with precedence. Accordingly, with respect to paragraph 26(5)(a) of the [Waters Act](#), the Board is satisfied that issuing the Licence to the Applicant will not adversely affect, in any significant way, any existing licensee or any other applicant, provided the Applicant complies with the conditions of the Licence.

## 5.5 Compensation to Existing Water Users

Paragraph 26(5)(b) of the [Waters Act](#) prohibits the issuance of the Licence unless the Board is satisfied that appropriate compensation has been or will be paid by the Applicant to persons who would be adversely affected by the or deposit of waste proposed by the Applicant, at the time when the Applicant filed the Application with the Board.

The Board received no claims for compensation either during the time period established in the Notice of Application, or during the remainder of the proceeding. Provided the Applicant complies with the Licence conditions, the Board is satisfied there are no water users or persons listed in paragraph 26(5)(b) of the [Waters Act](#) who will be adversely affected by the proposed deposit of waste.

## 5.6 Water Quality Standards

With regards to subparagraph 26(5)(c)(i) of the [Waters Act](#), no water quality standards have been prescribed in the [Waters Regulations](#); however, the LWB [Waste and Wastewater Management Policy](#) applies to the Licence, and the primary objective of the Policy is “protection of water quality in the receiving environment.”<sup>12</sup> The Board is satisfied that the conditions set out in the Licence are consistent with the Policy and compliance with these conditions will ensure that waste will be managed and disposed of in a manner that will be protective of water quality in the receiving environment. These conditions and detailed rationale are described in [section 6.7](#) (Licence).

---

<sup>12</sup> See MVLWB Policies and Guidelines webpage to access the LWB [Waste and Wastewater Management Policy](#).

## **5.7 Effluent Quality Standards**

The Project does not entail the disposal of effluent, so subparagraph 26(5)(c)(ii) of the [Waters Act](#) does not apply.

## **5.8 Financial Responsibility**

Under paragraph 26(5)(d) of the [Waters Act](#), before the Board can issue the Licence, it must be satisfied that the Applicant's financial responsibility is adequate to complete the Project, including any required mitigation measures, and the closure and reclamation of the site.

The Applicant is a public government, and the Board is confident that the Applicant is capable of meeting any financial obligations set out in the [Waters Act](#) and Licence.

As a result, and for the reasons set out above, the Board is satisfied that the legislated requirement to establish the financial responsibility of the Applicant for the Project has been met.

## **5.9 Minimization of Adverse Effects**

With regards to subsection 27(2) of the [Waters Act](#), the Board must ensure that the Licence conditions minimize potential adverse effects on other water and land users from the proposed deposit of waste. As discussed above in [section 5.1](#), the Applicant conducted pre-application engagement, and the Board also provided opportunities for potentially affected parties to make submissions to the Board during the regulatory proceeding. The Board did not receive notice of potentially adverse effects on other users of the water and lands in the Project area.

Regardless, as noted above in sections 5.9 and 5.10, and as detailed in [section 6](#), the Board has set conditions in the Licence to regulate waste management for the purpose of protecting the receiving environment. Additionally, as described in [section 6.5](#), based on the evidence, the Board has set conditions regarding the use of water for the Project, including limitations on the sources and volumes of water the Licensee can use. It is the opinion of the Board that compliance with the Licence conditions that have been set to protect the water sources and the receiving environment will also minimize any potential adverse effects on other water and land users in the Project area.

## **5.10 Time Limit**

As required under section 48(1) of the [Waters Act](#), the Board made its decision on the Licence within nine months after receiving the complete Application.

## 5.11 Environmental Review (Part 5 of the MVRMA)

### 5.11.1 Preliminary Screening

On March 14, 2024, the Board met and decided not to refer the proposed Project to Environmental Assessment.<sup>13</sup>

The Board is satisfied that the requirements of Part 5 of the [MVRMA](#) have been met for the Project.

## 6.0 Decision – Water Licence MV2024L8-0003

Having due regard to the facts, circumstances, and the merits of the submissions made to it, and to the purpose, and provisions of the [MVRMA](#) and the [Waters Act](#), the Board has determined that Licence MV2024L8-0003 should be issued, subject to the scope, defined terms, conditions, and term contained therein. The Board’s determinations and reasons for this decision are set out below.

The Licence has been developed to address the Board’s statutory responsibilities; to protect the receiving environment and minimize potential adverse effects on other water users; and to address issues within the Board’s jurisdiction that were identified and investigated during the regulatory proceeding.

In developing the Licence, the Board considered the LWB [Standard Water Licence Conditions Template](#) (Standard Licence Conditions)<sup>14</sup> and included a number of these standard conditions that are relevant to the Project. As noted in [section 4.0](#), Board staff circulated a draft Licence for review to allow Parties to provide specific input to the Board on possible conditions, and the Board considered these review comments and recommendations in making its determination on the Licence conditions.

The Standard Licence Conditions have been established by the Land and Water Boards (LWBs) based on information from LWB policies and guidelines, other applicable guidelines and best practices, meetings with Inspectors, input from LWB staff, and feedback from a public review. Each standard condition has been evaluated against the following characteristics of an ideal condition:

- Clearly part of LWBs’ authority;
- Has a clear purpose and rationale;
- Is practical and enforceable; and
- Does not conflict with existing legislation (i.e., is not less stringent).

The Standard Licence Conditions include general rationale for each standard condition, and as such, the language of any standard condition included in the Licence is only discussed in detail in the following sections of these Reasons for Decision when it specifically relates to concerns or recommendations raised during the regulatory proceeding. The Board’s reasons for developing and including Project-specific

---

<sup>13</sup> See MVLWB Online Registry for [GNWT – INF - Preliminary Screening Determination and RFD – Mar 19 24](#).

<sup>14</sup> See MVLWB Policies and Guidelines webpage to access the LWB [Standard Water Licence Conditions Template](#).

conditions, including discussion of any concerns and recommendations raised regarding these conditions, are detailed in the relevant sections below.

## **6.1 Term of Licence**

The Applicant has applied for a term of five years for the Licence. Subsection 26(2) of the [Waters Act](#) allows for a licence term of not more than 25 years for a type B licence. After reviewing the submissions made during this regulatory process, the Board has determined an appropriate term for the Licence is five years.

## **6.2 Part A: Scope and Defined Terms**

Part A of the Licence contains the scope and the defined terms used throughout the Licence.

### **6.2.1 Scope**

The scope of the Licence is written to ensure the Licensee is entitled to conduct activities which have been applied for and have been subject to Part 5 of the [MVRMA](#). In setting out the scope of the Licence, the Board endeavoured to provide enough detail to identify and describe the authorized activities, without being unduly restrictive or prescriptive, and to allow for Project flexibility, as contemplated in the Application, throughout the term of the Licence.

Based on the activities described in the Licence Application and on the scope outlined in the Standard Licence Conditions, Board staff included a draft scope in the draft Licence that was circulated for public review. The Board did not receive any comments or recommendations regarding the draft scope during the proceeding, so the Board accepted it as the scope of the Licence.

The conditions in Part A are consistent with the Standard Licence Conditions. These conditions ensure that the scope of the authorization includes all deposits of waste associated with the Project, and also clarify that the Licensee must comply with applicable legislation, including any changes to legislation that are deemed to automatically amend the Licence.

### **6.2.2 Defined Terms**

The Board defined certain terms in the Licence to ensure a common understanding of the conditions, to avoid future differences in interpretation of the Licence, to reflect Project-specific evidence, and to support consistency across licences and permits issued by the LWBs. For the most part, the Board selected applicable defined terms relevant to the Project from the Standard Licence Conditions.

## **6.3 Part B: General Conditions**

Part B of the Licence primarily contains general administrative conditions regarding implementation of the Licence, and compliance with the Licence conditions, Board directives, and LWB policies and procedures. This section also details compliance requirements and review and revision procedures for

submissions required under the Licence. These conditions are consistent with the Standard Licence Conditions and are applicable to all licences.

#### Part B: UPDATES TO SCHEDULES AND COMPLIANCE DATES

Compliance dates are included in the Licence conditions for various submissions and other requirements, and Schedule is appended to the Licence to set out the detailed requirements associated with specific conditions in the main body of the Licence. The purpose of the Schedule is to provide greater clarity and to aid in interpretation of Licence conditions.

This standard Condition is included in the Licence to clarify that the Board may, at its discretion, update compliance dates and the Schedules and that such updates are not considered amendments to the Licence, unless otherwise directed by the Board. Such updates may be requested by the Licensee in writing at least 90 days in advance or may be initiated by the Board based on the information available to it, and will undergo the Board's public review process before being considered by the Board.

#### Part B: ANNUAL WATER LICENCE REPORT and Schedule 1

The requirements for the Annual Water Licence Report are outlined in Condition 17 (ANNUAL WATER LICENCE REPORT), and Schedule 1, Condition 1. The purpose of the Annual Water Licence Report is to provide the Board and all interested parties the opportunity to be annually updated on Project components and activities and compliance with Licence conditions, and to provide a platform for interested parties to submit comments, observations, feedback, and questions as necessary. The Report is also an important tool for evaluating the effectiveness of the Licence conditions.

In establishing the Annual Report requirements in the Licence, the Board primarily included requirements from the Standard Licence Conditions that are applicable to the Project and reflect the Licence conditions. All of these requirements are intended to provide clarity and summarize information already captured through existing submissions; they are not meant to be onerous. The Board organized these requirements to coincide with the layout of the Licence and to be consistent with the Standard Licence Conditions.

For clarity, Annual Water Licence Reports are required each year, regardless of whether the Licensee has conducted any activity during the reporting year.

#### Part B: ENGAGEMENT PLAN – APPROVED

The Board assesses engagement adequacy through the LWB [Engagement and Consultation Policy](#) and [Engagement Guidelines for Applicants and Holders of Water Licences and Land Use Permits](#). In accordance

with the Policy and Guidelines, the Applicant included an Engagement Record and Plan in the Application,<sup>15</sup> and these documents were distributed for public review with the Application.

The Board has approved the Engagement Plan, Version 1 because it meets the requirements of the Policy and Guidelines and is appropriate for the Project activities.

#### **6.4 Part C: Conditions Applying to Security Requirements**

The Board did not include security requirements in the Licence. As per section 94 of the [MVRMA](#), territorial and federal governments are not required to post security for permits. Although this exemption does not include licences, it is Board practice to not require security for a water licence when the applicant is the territorial or federal government, as the liability with respect to the undertaking already rests with the government. The Board is satisfied that the Licensee will be accountable for carrying out closure and reclamation even though a security deposit is not required.

#### **6.5 Part D: Conditions Applying to Water Use**

Not applicable

#### **6.6 Part E: Conditions Applying to Construction**

Part E of the Licence contains conditions applying to Construction activities for the Project. These are consistent with the Standard Licence Conditions.

#### **6.7 Part F: Conditions Applying to Waste and Water Management**

Part F of the Licence contain conditions applying to Waste and Water management activities for the Project. These are consistent with the Standard Licence Conditions.

#### **Part F: WASTE MANAGEMENT PLAN - APPROVED**

All applicants must submit detailed waste management information, identifying all types of waste that will be produced by the project (including quantity and quality) and describing the disposal methods that are proposed for each type of waste. For most applicants, this will be in the form of a Waste Management Plan, developed in accordance with the LWB [Guidelines for Developing a Waste Management Plan](#),<sup>16</sup> and licences and permits will include standard conditions regarding compliance with the Plan, as approved by the Board. The Guidelines can be applied to a wide range of projects and are intended to ensure that all waste management activities are carried out in a way that is consistent with best practices and applicable guidelines to minimize waste released from a project.

---

<sup>15</sup> See MVLWB Online Registry for GNWT-INF – [Engagement Record V1.0 – Jan26 24](#) and GNWT – INF – [Engagement Plan V1.0 – Jan26 24](#).

<sup>16</sup> See MVLWB Policies and Guidelines webpage to access the LWB [Guidelines for Developing a Waste Management Plan](#).

The Licensee included a Waste Management Plan in the Applications.<sup>17</sup> The Board considered this Plan as part of the Application Package.

The Board has approved the Waste Management Plan, Version 1 because it meets the requirements of the Guidelines and is appropriate for the Project activities.

#### Part F: SEDIMENT AND EROSION CONTROL PLAN - APPROVED

Part F Sediment and Erosion Control Plan<sup>18</sup>, This Plan is required to ensure proper management of sediment and erosion is complete in accordance with the [Waters Act](#) and the objectives listed in Part F, Condition 1 (OBJECTIVE – WASTE AND WATER MANAGEMENT) of the Licence.

The Board has approved the Sediment and Erosion Control Plan, Version 1 because it is appropriate for Project activities.

#### **6.8 Part G: Conditions Applying to Aquatic Effects Monitoring Program**

Does not apply to this Licence.

#### **6.9 Part H: Conditions Applying to Contingency Planning**

Part H of the Licence contains conditions related to spill contingency planning and reporting, reclamation of spills and unauthorized discharges, and emergency response for the Project. These conditions are consistent with the Standard Licence Conditions.

#### Part H: SPILL CONTINGENCY PLAN - APPROVED

All applicants must describe spill contingency planning. For most applicants, this will be in the form of a Spill Contingency Plan, developed in accordance with the INAC [Guidelines for Spill Contingency Planning](#),<sup>19</sup> and licences and permits will include standard conditions regarding compliance with the Spill Contingency Plan, as approved by the Board.

The Licensee included a Spill Contingency Plan in the Applications.<sup>20</sup> The Board considered this Plan as part of the Application Package.

The Board has approved the Spill Contingency Plan, Version 1 because it meets the requirements of the Guidelines and is appropriate for the Project activities.

---

<sup>17</sup> See MVLWB Online Registry for GNWT-INF – [Waste Management Plan V1.0 – Jan26 24](#).

<sup>18</sup> See MVLWB Online Registry for GNWT-INF – [Sediment and Erosion Control Plan V 1.0 – Jan26 24](#).

<sup>19</sup> See MVLWB External Policies and Guidelines webpage to access the INAC [Guidelines for Spill Contingency Planning](#).

<sup>20</sup> See MVLWB Online Registry for GNWT-INF – [Spill Contingency Plan V1.0 – Jan26 24](#).

### **6.10 Part I: Conditions Applying to Closure and Reclamation**

Part I of the Licence contain conditions applying to closure and reclamation, including progressive reclamation of the Project. These are consistent with the Standard Licence Conditions.

Due to the small scale of the Project, in lieu of submitting a stand-alone Closure and Reclamation Plan, the Licensee described the proposed waste management activities in the Application Form. In this case, the Board considered this information equivalent to a Closure and Reclamation Plan. Due to the nature of the project, progressive reclamation will also be conducted. The project is for the placement of fill into a location which cannot be removed.

### **6.11 Attachment A: Concordance Table of Submissions**

Attachment A of the Licence contains a table that summarizes the submissions required by the Licence conditions.

### **6.12 Attachment B: Revision History Table**

Attachment B of the Licence contains a table which identifies updates and tracks changes made to the Licence. This table is currently blank because this is a new Licence, but it will be updated throughout the life of the Licence.

## **7.0 Conclusion**

Subject to the scope, definitions, conditions, and terms set out in the Licence, and for the reasons expressed herein, the MVLWB is of the opinion that the activities, waste disposal associated with the Project can be completed by Government of the Northwest Territories – Department of Infrastructure while providing for the conservation, development, and utilization of waters in a manner that will provide the optimum benefit for all Canadians and in particular for the residents of the Mackenzie Valley.

Water Licence MV2024L8-0003 contains provisions that the Board deems necessary to ensure and monitor compliance with the MVRMA, *Waters Act*, and the Regulations made thereunder, and to provide appropriate safeguards in respect of Government of the Northwest Territories – Department of Infrastructure’s deposit of waste authorized by the Licence.
