**Re: Land Use Permit Extension Request S07C-005 & S07C-006- Eagle Plains Resources Ltd - Mineral Exploration, Recce & Bronco Projects - Tulita District**

Upon review of the Land Use Permit Application for Eagle Plains Resources Ltd's mineral exploration in the Tulita District, the Sahtu Renewable Resources Board (SRRB) is satisfied that all requirements have been met, provided Eagle Plains Resources Ltd meets the conditions set in the existing permit.

The Board requests that the following recommendations be provided to Eagle Plains Resources Ltd:

- Trained environmental monitors familiar with the program area will be utilized and hired through the Tulita and/or Norman Wells Renewable Resources Councils.
- At least one week prior to commencement of the program each season, traditional users, community residents and organizations in Tulita and Norman Wells will be notified via posted notices.

If you require any other information, please contact us at (867) 587-3521 or [eam@srb.nt.ca](mailto:eam@srb.nt.ca).

Sincerely,

Andrea Hrynkiw  
Environmental Assessment Specialist
