Reference: Déline Water Licence Application – Future Plans / Manuals

Dear Tony,

Stantec has prepared the following documents on behalf of the Community of Déline to apply for a water licence with the Sahtu Land & Water Board.

Stantec has also been contracted by the Charter Community of Déline to complete the relocation of their sewage lagoon and decommissioning of the current solid waste site. Once design drawings are finalized and accepted by the Community, Stantec will submit the required documents to the SLWB for approval and an amendment to the water licence. In association with the project, Stantec will develop Abandonment and Restoration Plans for the sewage lagoon and solid waste site which are to be decommissioned; these will be provided to the SLWB.

Considering the future changes to the Community's facilities, we request that Operation and Maintenance Manuals not be required for the current facilities (solid waste site and sewage lagoon) as they are planned to be decommissioned next season. New Operation and Maintenance Manuals will be submitted for the new solid waste site and sewage lagoon at that time.

Regards,

STANTEC ARCHITECTURE LTD.
