**Re: Water Licence S12L3-006
 Deline Closure and Reclamation Plan – Solid Waste Site
 Revisions Needed**

On March 14, 2013, the Charter Community of Deline submitted to the Sahtu Land and Water Board (SLWB) a Closure and Reclamation Plan for the decommissioning Solid Waste Disposal Facility. Based on reviewer comments and concerns, this Plan cannot be accepted or approved in its current form.

To ensure the proper closure and reclamation of the Solid Waste Disposal Facility, a revised Plan is necessary for the protection of the environment and public health. GNWT - MACA and ENR have agreed to work with the Community of Deline to assist in the development of a mutually agreed upon Closure and Reclamation Plan.

The Board therefore, requests that the Community of Deline, MACA, and ENR submit to the Board within 60 days of this letter an implementation schedule outlining the roles and responsibilities of each party in developing a suitable Closure and Reclamation Plan. This schedule shall also include timelines for developing the Plan. The Board also, sets a deadline of September 30, 2013 for submission of an agreed upon Closure and Reclamation Plan. This will allow for a proper environmental site assessment over the summer months.

Should you have any questions regarding this request, please contact the Sahtu Land & Water Board office.

TELEPHONE: (867) 598-2413 • FAX: (867) 598-2325
