Re: Water Licence S12L3-006
Deline Closure and Reclamation Plan – Solid Waste Site and Sewage Lagoon
Expected Submission Deadline

In the Board's original letter from April 19, 2013, a deadline of September 30, 2013 for submission of Closure and Reclamation Plans was requested. Upon further discussions between the GNWT and Deline, it is understood that this deadline is no longer feasible. In a letter from GNWT – Environment and Natural Resources from July 5, 2013, an implementation schedule was submitted, which indicated an expected submission of Closure and Reclamation Plans for sometime in July or August 2014.

Based on this information and to ensure that Closure and Reclamation Plans are submitted, as required by the Charter Community of Deline's Water Licence, the Board is requesting a deadline of **August 1, 2014**, for the submission of both Closure and Reclamation Plans. This date gives the GNWT and the Charter Community of Deline a full year to conduct any site assessments and prepare the necessary plans.

Should you have any questions regarding this request, please contact the Sahtu Land & Water Board office.

Thank you for your time and effort on this matter.

Yours sincerely,

A handwritten signature in blue ink that reads 'Larry Wallace'.

Larry Wallace
Chair
