SLWB WL S13L1-006

Attention: Bonnie Bergsma, Regulatory Specialist

Dear Sabrina:

Re: Request for Renewal of Water Licence S13L1-006 (Slater River Site Wide Services)

Husky Oil Operations Limited (Husky) acknowledges that Water Licence (WL) S13L1-006 will be expiring on October 23, 2018. At this time, we are requesting a renewal the WL with a revised expiry date of October 23, 2020 (please see attached Water Licence renewal application form).

The WL is applicable to Husky's oil and gas exploration activities associated with the Slater River project. Husky's Site Wide Services operations licenced under this WL including the following:

- Security station
- Winter access
- Construction camp
- All-weather staging site
- All-weather access
- Bridges & culverts
- All-weather base camp
- Fuel storage
- Airstrip
- Heli-pads

Winter access and camp operations were originally licenced under WL S11L3-002 and the all-weather road, bridges, culverts, all-weather base camp, all-weather staging site and quarry operations were licenced under WL S12L8-007. In order to allow for improved efficiency and overall reporting to the Sahtu Land and Water Board (SLWB), Husky consolidated these two Water Licences into the new WL S13L1-006 in 2013.

Site Wide Services operations are in place to support activity on the Little Bear N-09 and Little Bear H-64 well locations which are currently both suspended and set for downhole abandonment in the winter 2018/19 (LUP S13A-002 and WL S13L1-005). Husky has prepared supporting documentation to outline the activity involved in well abandonment and will submit the updated documents including: Project Description, Equipment Lists, Emergency Response Plan & Spill Contingency Plan, and Waste Management Plan under separate cover.

No additional water use is required during the WL renewal period. No changes to the existing terms and conditions of the WL are being requested.

As outlined in the engagement record attached as Schedule A to Husky's request for a 2-year extension of the associated Land Use Permit S13X-003, Husky has informed affected Indigenous communities, Land Corporations, Renewable Resource Councils and regulators in the Sahtu Region of its intention to request a renewal of the WL. No concerns have been raised to Husky regarding

Husky Oil Operations Limited

the request for a renewal of the WL. Given that this renewal request will not require any new water use or modifications to approved works, Husky humbly requests that this WL renewal request be exempt from Preliminary Screening.

I trust this letter is sufficient for the Land and Water Board to grant a renewal of the WL. If you require additional information or, if you have any questions, please contact the undersigned at 403-523-2313 or by email at (jenica.vonkuster@huskyenergy.com).

Sincerely,

Husky Oil Operations Limited

Jenica von Kuster
