

**Subject:** RE: Norman Wells Bosworth Creek Erosion Mitigation Project - Modification Notification S13L1-007 Part G (1a)

**Date:** Friday, February 24, 2023 at 9:33:43 AM Mountain Standard Time

**From:** Morton, Tim

**To:** Fraser, Benjamin C, Bonnie Bergsma

**CC:** Gregory, John C, Fischbein, Alys M

Hi Ben,

Thank you for the notification and the detailed plan. The Inspector agrees with the approach and considers it necessary work to avoid erosion and future issues with the infrastructure near Bosworth Creek. We will require the following information/actions during and after the project:

- Details of the riprap brought in including volumes, quarry information and seller information
- Detailed drawings of any trail/roads constructed to access the area
- Before and after photos of all areas of the project including the creek, slumping area, access trails, bush disposal, refueling station, etc. These photos should detail the project and explain the work that was completed.
- All removed brush should be spread around the area and not piled as this can cause wildlife obstructions. No brush should be left on the ice and placed in an area where it will not enter the creek during freshet.
- Detailed work report outlining dates, work completed, issues encountered, future concerns, etc
- Details on future monitoring of the area
- Details on the removal and ultimate disposal of sediment from the creek surface and any material removed from the creek bank
- Any other information that you feel would be important for the project

It is also expected that any deviation from the proposed plan is communicated with the Inspector before the work continues.

Please provide this information as soon as possible after the completion of the project. It is also expected that a minimum of 72 hour notification is provided to me to allow for the planning of an inspection if required.

Thank you and please let me know if you have any questions.

Tim Morton

**Subject:** Norman Wells Bosworth Creek Erosion Mitigation Project - Modification Notification S13L1-007 Part G (1a)

Good evening Bonnie,

As discussed this afternoon, please see attached for the proposed Bosworth Creek erosion mitigation project.

DFO has already been engaged and will be completing a project review prior to execution between March 14-28, 2023. Imperial appreciates the prompt review and acknowledges the shortened notification timeline with this scope of work. After reviewing the attached document, if there are any questions or concerns, please don't hesitate to reach out.

Kind regards,

**Benjamin Fraser**
