Dear Joel Gowman,

Great Bear Lake Sites – 2021 Annual Water Licence Report – Recommendations Supported

The Sahtu Land and Water Board (SLWB) met on September 22, 2022, to consider the 2021 Annual Water Licence Report submitted on March 31, 2022, in accordance with Part B, Condition 15 and Schedule 1 of Licence S17L8-002. Based on reviewer comments and Board staff review, the Board was satisfied that the Licensee has met the requirements of the Licence.

The Board supports the following recommendations made by reviewers:

- a) Investigate historic climate change data to determine if precipitation patterns influence metal concentrations at SNP station NX-3 as suspected by the Licensee.

The ongoing cooperation of Crown-Indigenous Relations and Northern Affairs Canada – Contaminants and Remediation Division is appreciated. If you have any questions or concerns, please contact Benjamin Roy at broy@slwb.com.

Respectfully,

Benjamin Roy
