Subject: RE: S17L8-003 - Norman Wells Airside LTU - Stockpile Removal - Approval Required - SP7,8 and Grid Composites 1 and 2

Hello Andrea,

The SLWB has reviewed the soil sample chemistry results for Stockpiles 7 and 8 and grid composites 1 and 2 and concur that the samples have met the Water Licence criteria as detailed in the memo dated October 18, 2018. The soil may be moved from the bermed areas.

Regards,

Hello Andrea,

It looks like the samples have met the Water License criteria, so I approve.

Erin

Grid Composites 1 and 2  
Importance: High

Hi Bonnie, Trevor and Erin,

Please find attached a memo presenting the chemistry results for two stockpiles and two grid areas that are currently located within the bermed area of the Norman Wells Airside LTU.

We are requesting approval to move these stockpiles within the bermed area to facilitate further soil sampling and characterization work. The soil chemistry for these stockpiles meets the requirements in the Water Licence and the attached memo details these results.

We are requesting a timely response as we need to continue moving soils so we can access the sub-liner soil and complete the sampling this season.

Trevor and Erin – I have CC'd Aaron Barker who is currently on site for BluMetric so please feel free to contact him if you want to arrange a site visit.

Please review the attached and contact me with any questions or concerns.

Regards,  
Andrea
