Subject: RE: S17L8-003 & S17X-004 - Norman Wells Airport - Landfarm and Monitoring Well Installation

Hi Paul & Sabrina,

Just wanted to let you know that the drilling is not happening as planned this week. The weather is too cold and the drillers made the call late on Friday. My apologies for not notifying you sooner as I was on vacation last week.

We will let you know when the work is rescheduled. Please advise if there is anyone else that I should be keeping in the loop on this project.

Regards,
Andrea

Hi Paul – Please see the email trail below.

Transport Canada suggested that I email this information to you. We would like to confirm that this information has been received within the timelines set by the water licence.

Thanks and happy holidays.

Andrea

Hi Jenna

I found your contact information on the website.

Sabrina Sturman is the contact for SLWB for the above reference Water Licence but she is on vacation until January 9 which is when our work is set to begin.

Can you please forward the message below onto the appropriate parties in Sabrina's absence? We want to ensure that we are in compliance with the Licence and the attached information is required before the 9th of January.

Regards,
Andrea

Subject: S17L8-003 & S17X-004 - Norman Wells Airport - Landfarm and Monitoring Well Installation

Hi Sabrina,

I am sending this message on behalf of Melissa Fraser - Transport Canada and Michael Brownlee - Public Services and Procurement Canada regarding Water Licence S17L8-003 and Land Use Permit S17X-004.

The following are responses to Conditions within the Water Licence.

Water Licence Condition F.8

Please find attached the revised figure requested under Licence Condition F.8. Note that the figure requested was on a 1:50,000 scale, but the well locations are not legible due to the scale. We have included an additional figure as well with the well locations and their coordinates clearly shown.

Water Licence – Part C 26.1 b Sections 4, 5 and 6

The details of the January work are as follows:

Drilling and Soil Sampling: January 8-10, 2018
Field Supervisor: Alexandra Duchesne, BluMetric – Cell Phone #: 514-216-3165
Alternate Supervisor: Daniel Tucholski, BluMetric – Cell Phone #: 867-446-3973
Project Manager: Andrea Jenney, BluMetric – 705-525-6075 x25 or cell 705-690-2683

All equipment will be removed once drilling and sampling is completed on January 10, 2018.

Please advise whether we need to call 867-587-7203 as well or if this email notification is sufficient.

Water Licence Condition B.9

The requirement to post signs at the Landfarm and SNP stations must be completed by February 3, 2018. We do not anticipate returning to Norman Wells following the drilling until later in the season. As a result, we are planning on installing signs on the new monitoring wells that are being drilled indicating their monitoring location number as referenced in the Water Licence. We will attempt to install an identifier on the Landfarm itself but this may be challenging due to the winter conditions. We will advise as to what we are able to accomplish in January and will complete outstanding signage at a subsequent site visit.

If you have any questions or concerns, please reply to all and we will do our best to respond.

Regards,
Andrea
