**Re: Deline New Solid Waste Facility Water Licence S18L3-001**

Dear Mr. Dolphus,

I would like to inform you that ENR has approved Délįnę's New Solid Waste Facility's O and M Plan (version 2) and to use the new facility at this time in accordance to the recommendations that were made in the last review from the Sahtu Land and Water Board on December 23, 2020.

The following recommendations were from the public review outcome:

- A) A detailed list of the heavy equipment used in operation and maintenance of the SWF be submitted to the SLWB
- B) Licensee is expected to regularly monitor the integrity of geosynthetic clay liner and promptly replace the liner as required. Monitoring is to be done every year along with the SNP sampling.
- C) Licensee must make plans to install groundwater monitoring wells to check for leachate from the new SWF
- D) Licensee must provide information on the by-laws for prevention of spillage of hazardous chemicals into the environment by community members.
- E) Example log sheet for recording the information on hazardous waste/unacceptable waste and their shipment must be attached to the revised O and M Plan.
- F) Clarification regarding spring clean-up must be updated in the O and M Plan.
- G) Licensee must conduct SNP training program especially when there are new staff members involved in the SNP Sampling.
- H) The licensee is required to submit an Interim Closure and Reclamation Plan by December 22, 2021
- I) The clarification regarding the sedimentation pond must be updated in the O and M Plan.

- J) GPS coordinates for the SNP locations 0555-6 and 0555-7 (for monitoring surface runoff from the new SWF) should be described and recorded in the Annual Water Licence Report.

We would also like to acknowledge that the DGG will need to submit a Version 3 of the O and M plan that includes all of the recommendations to the Sahtu Land and Water Board for the New Solid Waste Facility by March 31, 2021.

A copy of this letter will be submitted to the SLWB, if you have any questions or concerns please do not hesitate to contact the Water Resource Officer (Inspector) Erin Goose at Work: (867) 587-3517, Cell: (867) 587-6765 or email [Erin\\_Goose@gov.nt.ca](mailto:Erin_Goose@gov.nt.ca).

Sincerely,

**ORIGINAL SIGNED**

Erin Agnes Goose  
Water Resource Officer
