

Subject: Extension Request for TRANSPORT CANADA - S18X-003

Date: Friday, September 1, 2023 at 1:38:07 PM Mountain Daylight Saving Time

From: Campbell, Reid (TC/TC)

To: Bonnie Bergsma

CC: Schaubroeck, Jennifer (TC/TC)

UNCLASSIFIED / NON CLASSIFIÉ

Hello Bonnie,

I am providing the following as a starting place for an extension request for Transport Canada's Land Use Permit S18X-003. Please let me know if you need additional detail or more formal documents to finalize the application.

I am very sorry that the territory is dealing with such extreme fires, and that Yellowknife had to be evacuated. I hope you are safe and as well as can be given the circumstances. I do not expect a prompt response, or for this licence to be a priority for SLWB or the GNWT at this time.

Reason for the extension request:

The Monitoring wells are still in use and are not ready to be decommissioned at this time.

Length of time the permittee is requesting for the extension:

2 years

Engagement record for the extension:

Prior to the commencement of the 2018, 2020, and 2022 groundwater sampling work, TC engaged the Norman Wells Airport as an affected party to ensure any concerns were incorporated into our program of work and that access to the airport property could take place in accordance with airport requirements.

If further engagement on this project is required, please advise.

Other information in support the extension request:

Monitoring is ongoing. TC is continuing to monitor the groundwater to ensure trends continue to decrease and eventual final decommissioning can take place when groundwater analytical results meet applicable standards/criteria.

I will be away next week, and I will not be able to reply to any requests until September 12th. Jennifer Schaubroeck will be covering for me (cc'd).

Sincerely,

Reid Campbell
