Dear Mr. Wallace:

**Re: Selwyn Chihong Mining Ltd. Land Use Permit S16C-002**

The Permit listed above is expiring on November 23, 2021. Our original plans for drilling in this area had to be changed because of economic consideration. However, our recently completed Pre-feasibility Study for this project indicates that we will need to complete the exploration work that gave rise to the application for this Permit.

Please consider this letter as our formal request to renew Permit S16C-002 for another 5 years.

All correspondence related to this renewal application should be directed to my attention at:
