

# Land and Water Boards of the Mackenzie Valley

## LAND USE PERMIT APPLICATION FORM

Subsection 19(2) and Schedule 2 of the [Mackenzie Valley Land Use Regulations](#)

Use an "X" to indicate which Board the Application is being made to:	Mackenzie Valley Land and Water Board:		Sahtu Land and Water Board:	X
	Wek'èezhìi Land and Water Board:		Gwich'in Land and Water Board:	

To complete this Form, please refer to the MVLWB [Guide to the Land Use Permitting Process](#) (Guide) and fill in the grey fields; attach additional pages, as necessary. Indicate N/A in the grey fields for Items or parts of Items that are not applicable. An application package checklist is provided in the Guide. Review the following MVLWB guidance for formatting your Application Package:

- [Document Submission Standards](#)
- [Standard Outline for Management Plans](#)

If applicable, provide the existing or current Land Use Permit file number:	S16C-002	
Use an "X" to indicate if this Application is accompanied by an Application for a Water Licence:	Water Licence – in a non-federal area:	
	Water Licence – in a federal area:	

### 1. NAME AND CONTACT INFORMATION – APPLICANT

Applicant's Name:	Gabe Xue		
Position:	Principal Geologist		
Company Name:	Selwyn Chihong Mining Ltd		
Mailing Address:	#501-3292 Production Way		
Community:	Burnaby	Telephone:	1-604-620-6188
Prov/Terr:	BC	Email:	gxue@chihongmining.com
Postal Code:	V5A 4R4	Other:	

**2. NAME AND CONTACT INFORMATION – APPLICANT’S HEAD OFFICE**

Include a Certificate of Corporate Registration from the Government of the Northwest Territories in your Application Package.

Use an “X” to indicate this information is the same as Item 1 above:			<b>X</b>
Name:			
Position:			
Company Name:			
Mailing Address:			
Community:			
Prov/Terr:		Telephone:	
Postal Code:		Email:	
Field Supervisor:		Other:	

**3. NAME AND CONTACT INFORMATION – CONTRACTORS AND SUB-CONTRACTORS**

Include relevant names, responsibilities, and contact information. An additional table should be added for each contractor and sub-contractor.

Name:			
Position:			
Company Name:			
Mailing Address:			
Community:		Telephone:	
Prov/Terr:		Email:	
Postal Code:		Other:	

<b>X</b>	Use an “X” to indicate that contractor and/or subcontractor information is not available at this time.
----------	--

**4. LOCATION OF ACTIVITIES**

Use the grey fields below to provide or reference the following information:

Traditional Place Name:

Maps and Geographic Information System (GIS) Data: Include a map in your Application Package identifying local geographic features, watercourses and water sources, project structures, and location(s) of any proposed waste deposits. Provide geographic coordinates (latitude and longitude) of project features, and the maximum and minimum project boundary in degrees, minutes, seconds, or decimal degrees. Include GIS data in your Application Package, if applicable. Refer to the MVLWB [Geospatial Data Submission Standards](#) for providing geographic information.

Minimum latitude:	62°26’ N	Maximum latitude:	62°37’ N
Minimum longitude:	129°05’ W	Maximum longitude:	129°35’ W

NTS Map Sheet No.: Provide the map sheet number: 105 I/06, 07, 10, 11, and 12

Land Types: Use an “X” to indicate the type(s) of the land on which the activities are proposed:

Free Hold/ Private:	<input type="checkbox"/>	Commissioner’s/ Territorial Lands:	<input checked="" type="checkbox"/>	Federal Land:	<input type="checkbox"/>	Municipal Land:	<input type="checkbox"/>
------------------------	--------------------------	---------------------------------------	-------------------------------------	---------------	--------------------------	-----------------	--------------------------

## 5. ELIGIBILITY

Refer to section 18 of the [Mackenzie Valley Land Use Regulations](#). Use an “X” to indicate which one applies:

18(a)(i):	<b>X</b>	18(a)(ii):		18(a)(iii):		18(b):	
-----------	----------	------------	--	-------------	--	--------	--

## 6. RIGHTS AND/OR CONTRACTS TO SUPPORT ELIGIBILITY

Contact Indigenous, federal, and territorial governments, and other parties to ensure all appropriate rights, authorizations, permissions, dispositions, and contracts have been obtained or are in the process of being obtained (e.g., mineral exploration rights, quarry permits, licences of occupation, leases, access agreements and authorizations, etc.). List and provide confirmation of other authorizations that relate to the proposed activities; reference these in your Application Package (e.g., rights, permits, licences, etc.).

The mining leases and claims are located on Crown land. The nearest Sahtu Settlement Area Land Selections are approximately 100 km to the north. Yukon Mining Class 4 Land Use Approval LQ00525 is the basis for permitted infrastructure requirements to support the proposed drilling program. A Type A Land Use Permit is the only permit required by the applicant to carry out the proposed activity.

## 7. PERMIT TYPE AND CRITERIA

Refer to sections 4 and 5 of the [Mackenzie Valley Land Use Regulations](#). Use an “X” to indicate which permitting criteria apply:

Type A			Type B			Type C	
4(a)(i):		4(b)(i):	<b>X</b>	5(a)(i):		5(b)(i):	
4(a)(ii):		4(b)(ii):		5(a)(ii):		5(b)(ii):	
4(a)(iii):		4(b)(iii):		5(a)(iii):			
4(a)(iv):		4(b)(iv):	<b>X</b>	5(a)(iv):			
4(a)(v):				5(a)(v):			
				5(a)(vi):			

## 8. PROJECT DESCRIPTION

Include a project description in your Application Package, or for small-scale projects, describe the proposed activities in the grey field provided below. Include the name and type (e.g., lake, river) of water source(s), and the purpose and quantity of water to be used (rates, volumes (m<sup>3</sup>/day)). Indicate the total number of hectares to be used in each phase of the project, as well as through the life of the project.

The proposed drill program is similar to the drill program which is outlined in the Type A Land Use Permit S16C-002.

Selwyn Chihong Mining Ltd. is currently carrying out mineral exploration at Howard's Pass in the Yukon under Land Use Permit LQ00525. This Land Use Permit allows for the establishment of camps, storage of fuel, carrying out of diamond drilling and other mineral exploration activities, clearing of trails and other activities required by advanced mineral exploration. The Company has established 2 camps capable of supporting 50 people each, are operating up to 8 to 10 diamond drills on their mineral claims and using 2 airstrips, located on the property in the Yukon, to support the operation. The company has heavy equipment (CATs, backhoe, excavators) at the mineral properties in the Yukon as well as helicopters and the necessary service crews. Drills are moved by towing on a sled with a CAT (requires use of existing trails and /or creation of new CAT trails) or by helicopter lift.

The Company holds several mineral leases and claim blocks in the Northwest Territories, located less than 1 km from the existing XY camp and its support infrastructure. This Land Use Permit Application is intended to allow the Company to extend their exploration activities to these claims and leases using the existing camps, infrastructure, and equipment that are currently in place on the Yukon side of the border.

The permit application does not include a request for the development of any new camps or infrastructure in the Northwest Territories. The Company will simply use helicopters and CATs to move drills to the claims in the NWT. All crews and equipment will be supported from the existing camps that are permitted in the Yukon.

There will be up to six drills in operation on the claims and leases in the Northwest Territories. The drills will be in operation from approximately June to November of each field season. The duration requested for the Land Use Permit Renewal is 5 years. Surface disturbance will be limited to small areas, as required, to establish drill sites. In these areas vegetation will be laid flat (if below tree line) and a small area (approx. 100 m<sup>2</sup>) will be leveled to allow sitting of the drill. A complete description of potential environmental effects and mitigations was provided in *Attachment 5* during the initial application in 2016. The only revision to Attachment 5 is the logo for SCML.

## 9. CAMP

Describe the proposed camp size and layout. Indicate the number of person-days; explain, with rationale, any variations in the number of people that may be on site over the life of the project.

No camps are to be set up. Personnel will be based in a nearby camp in the Yukon and will be flown by helicopter or use existing infrastructure to access the area.

## 10. ROADS AND ACCESSES

Provide detailed information about the construction, location, and decommissioning of any roads and accesses.

Use an "X" to indicate if this is to be a pioneered road or access:	Yes		Use an "X" to indicate if the route has been laid out or ground-truthed:	Yes	
	No			No	

There are no roads required for the proposed activity. Drill moves will be accomplished using existing CAT trails from previous exploration work. Some new CAT trails may be required to skid drills to previously unexplored areas. The total combined length of all new CAT trails is approximately 10 km, which will be reclaimed each year, and new trails will not exceed 2.5 m in width.

## 11. PROPOSED WASTE MANAGEMENT METHODS

Use the grey fields below to provide or reference the following information:

Waste Management Plan: Include a Waste Management Plan in your Application Package, if applicable, or for small-scale projects, describe the proposed waste management activities in the grey fields provided below. A template for the Plan can be found in the MVLWB [Guidelines for Developing a Waste Management Plan](#).

Waste Type	Management Method(s)
Garbage:	Managed through existing camps in the Yukon
Sewage (Sanitary and greywater):	There is no camp therefore there will be none.
Brush and trees:	They will be laid flat where they have been cleared.
Overburden (Organic soils, waste material, etc.):	Stockpiled and pulled back in place for reclamation
Other (describe):	A revision of SCML's Comprehensive Waste Management Plan has occurred and is <i>Attachment XX</i>

Off-site Disposal: If waste is proposed to be disposed of off-site within the NWT, written confirmation (e.g., an email, letter, etc.) from the facility/facilities indicating they will accept the waste is required. Include it/these in your Application Package. Please note this information will be required by the Board prior to commencement of activities.

## 12. EQUIPMENT

Identify the types of equipment proposed to be used.

Number	Type/Description	Size (weight in tonnes)	Proposed use
1	Caterpillar Dozer	D7	To move drills and rehabilitate roads
1	Caterpillar Excavator	345	To construct sumps and rehabilitate roads.
6	Diamond Drills	Boles 25A/37 (or similar)	Diamond Drilling
Unknown	Water Pumps	Depending on distance and drop to water source.	To supply drills with water.

**13. FUEL**

Identify all fuel types proposed to be used.

Type of Fuel	Number of containers	Capacity of containers (e.g., litres, pounds)	Type of container (e.g., barrel, tank, tidy-tank)	Proposed storage or staging location(s)
Diesel:	≤19 (<4000L)	45 Gallon Drums (205 L)	Barrel	Fuel Cache
Gasoline:	N/A	N/A	N/A	N/A
Aviation Fuel:				
Propane:				
Other: (describe)				

**14. METHODS OF FUEL TRANSFER**

Describe the proposed methods to transfer fuel.

All fuel will be slung in drums from the main camp, by helicopter, to fuel caches and drill sites or moved by CAT sloop. Tidy tanks on pickup trucks will be used to fuel the drills and equipment. Fuel will be pumped from drums or tidy tanks with either hand-powered or electrical pumps

**15. SPILL CONTINGENCY PLAN**

Include a Spill Contingency Plan in your Application Package, if applicable, or for small-scale projects, provide relevant details in the grey field provided below. An example of this Plan can be found in the INAC [Guidelines for Spill Contingency Planning](#).

The Spill Contingency Plan (attachment XX) has been revised to capture the company logo change and to capture suggestions made in previous assessments.

**16. PROPOSED PROJECT SCHEDULE AND TERM**

Indicate the proposed project start and completion dates and the time of year the project activities are planned to occur. Describe any anticipated temporary closure(s) or seasonal shutdowns. Indicate the term requested.

Start Date:	November 1, 2021	Completion Date:	November 1, 2026
Term of Permit Requested:	5 Years		

## 17. POTENTIAL ENVIRONMENTAL IMPACTS OF THE PROJECT AND PROPOSED MITIGATIONS

If the proposed project, or parts of the proposed project, may be exempt from preliminary screening, describe the rationale for the exemption in the grey field below. Include the date of the most recent screening, and/or the environmental assessment or impact review number.

SCML is applying for a preliminary screening exemption. SCML is confirming that the project has not been modified in accordance with the Preliminary Screening Regulations and the exemption list regulations. Additionally, the renewal application covers all of the activities currently included in the existing permit S16C-002 (after approval of the renewal Permit) as per section 37 of the MVLUR.

Unless the project could be exempt from preliminary screening, using the Impact-Mitigation Table below, or the more detailed Table in Appendix D of the [Guide](#), identify all potential impacts and possible mitigations that are relevant to the proposed project, and indicate whether any of the mitigation measures have been developed as a result of input from affected parties. Possible potential impacts are listed below; however, these lists are not exhaustive and may not apply to all projects. All information provided should reflect the size, scale, and nature of the proposed project. Cumulative impacts and climate change must be considered. Attach additional pages if needed.

Potential Impacts <i>Use an "X" to indicate which apply</i>	X	Potential Project Impacts and Proposed Mitigations <i>Describe the potential impact(s) and the proposed measure(s) to reduce each of these impacts.</i>
<b>ABIOTIC COMPONENTS</b>		
<b>Land</b>		
Soil contamination	X	Potential Impact(s): Spills Proposed Measure(s) to reduce impacts: SCML will implement best practices to prevent spills and, should a spill occur, SCML will follow the approved Spill Contingency Plan.
Soil compaction	X	Potential Impact(s): ??? Proposed Measure(s) to reduce impacts: Minimize area of disturbance
Destabilization/erosion	X	Potential Impact (s): ??? Proposed Measures: Minimize disturbance; the permit requires reclamation and seeding within a year of completion of operation.
Change in soil structure		
Inability to support vegetation		
Other – minor vehicle and equipment air emissions	X	Potential Impact(s): Environmental and human impacts. Proposed Measure(s) to reduce impacts: Ensure that all vehicles and equipment are in good condition, leak free and are not left to idle when unnecessary.
<b>Water</b>		
<b>Groundwater</b>		
Water table alteration		

<b>Potential Impacts</b> <i>Use an "X" to indicate which apply</i>	<b>X</b>	<b>Potential Project Impacts and Proposed Mitigations</b> <i>Describe the potential impact(s) and the proposed measure(s) to reduce each of these impacts.</i>
Infiltration changes	X	Potential Impact(s): Infiltration to ground and decreased stability. Proposed Measure(s) to reduce impacts: Less than 100 m <sup>3</sup> /day in total will be used at up to six drills with water discharged to sumps which infiltrate to groundwater. Water use is small and required only temporarily during drilling. Measures will be taken to conserve and control drill water use.
Changes in water quality	X	Potential Impact(s): Contaminants entering water course and harm terrestrial and aquatic environmental conditions. Proposed Measure(s) to reduce impacts: Implement best practices to prevent spills and implement the Spill Contingency Plan, if required.
Temperature changes		
Other		
<b>Permafrost</b>		
Loss or change in extent		
Changes in seasonal fluctuations		
Change in persistence		
Other	X	Potential Impact(s): Permafrost regime alteration Less than 4ha of ground disturbance in an area of discontinuous permafrost. Proposed Measure(s) to reduce impacts: Minimize disturbance; replace vegetative mat where possible. The permit requires reclamation and seeding within a year of completion of operation.
<b>Surface Water</b>		
Water flow or level changes (permanent, temporary, seasonal)		
Drainage pattern changes	X	Potential Impact(s): Ground saturation and stability. Proposed Measure(s) to reduce impacts: Drill water will be minimized and kept less than 100 m <sup>3</sup> /day
Temperature changes		
Changes in water quality	X	Potential Impact(s): As no fish are present in the area impacts will be minimal. Proposed Measure(s) to reduce impacts: Implement best practices to prevent spills and implement the Spill Contingency Plan if required. The existing land use permit requires that hazardous materials use/storage and drilling occur 30m away from creeks to minimize erosion, and that all drilling water be directed to sumps with no discharge to creeks or ponds
Wetland impairment		
Changes to aquatic habitat (see Biotic section below)		
Other		
<b>Air</b>		
Changes in air quality	X	Potential Impact(s): Harmful to humans, animals, and surrounding environment. Proposed Measure(s) to reduce impacts: Ensure that all vehicles and equipment are in good condition, leak free

<b>Potential Impacts</b> <i>Use an "X" to indicate which apply</i>	<b>X</b>	<b>Potential Project Impacts and Proposed Mitigations</b> <i>Describe the potential impact(s) and the proposed measure(s) to reduce each of these impacts.</i>
		and are not left to idle when unnecessary.
Harm to living things		
Increased greenhouse gases	X	Potential Impact(s): Effect on contribution to global greenhouse gas and increasing climate change. Proposed Measure(s) to reduce impacts: Ensure that all vehicles and equipment are in good condition, leak free and are not left to idle when unnecessary.
Other		
<b>BIOTIC COMPONENTS</b>		
<b>Vegetation</b>		
Direct loss of vegetation		
Loss of Species at Risk or may-be-at-risk plants		
Change in species composition	X	Potential Impact(s): Minor changes can occur with land disturbance. Proposed Measure(s) to reduce impacts: Reclaim area with an approved native seed mix.
Introduction of non-native (invasive) species		
Effects on plant health (dust, metals, toxins)		
Increased risk of fire		
Compaction of vegetation	X	Potential Impact(s): Revegetation issues and erosion. Proposed Measure(s) to reduce impacts: Minimize the area of disturbance and complete seeding within a year of completion of operation. Take care to ensure root stock is intact when stockpiling material.
Other		
<b>Terrestrial Wildlife Habitat</b>		
Direct loss or removal of habitat, dens, or nests	X	Potential Impact(s): Potential wildlife disruption due to exploration noise and activity, in particular South Nahanni Caribou and Grizzly Bear. Disturbance is seasonal while drilling, over five years, and within a small area of the herd range where there is some post-calving use. Calving and rutting areas are generally found outside of the proposed exploration area based on surveys conducted from 2007 to 2011, 2014, 2015 and 2019. Proposed Measure(s) to reduce impacts: Follow guidelines, processes and procedures outlined in the No hunting, feeding, or harassment policy; ensure that garbage is removed and burned daily. The permit requires: (1) minimizing disturbance of habitat, (2) proper food handling and garbage disposal, (3) maintain aircraft away from bird concentrations, (4) notification of SRRB of large game within 500 m, (5) temporary suspension of operation when caribou are in the immediate vicinity.
Loss or removal of keystone species and/or Species at Risk habitat		

<b>Potential Impacts</b> <i>Use an "X" to indicate which apply</i>	<b>X</b>	<b>Potential Project Impacts and Proposed Mitigations</b> <i>Describe the potential impact(s) and the proposed measure(s) to reduce each of these impacts.</i>
Fragmentation of wildlife corridor		
Direct injury or mortality	X	Potential Impact(s): Direct injury or mortality Proposed Measure(s) to reduce impacts: While driving a vehicle, if wildlife is visible within 500 m of the road, speed will be reduced to minimize disturbance to the wildlife. The horn will not be honked to attempt to move wildlife. SCML Team will wait for wildlife to move off or navigate cautiously around them and carry on. On radio-controlled roads, the location of the sighting will be noted and nearby vehicles will be alerted of wildlife hazards on the road.
Disturbances to key lifecycle stages: breeding, feeding, nesting, staging	X	Potential Impact(s): Potential to disturb breeding birds. Proposed Measure(s) to reduce impacts: Environment department to conduct nesting checks ahead of accessing drill pads if drilling will occur during nesting season in nesting habitat. Cordon off buffer zone if/where nests found.
Effects on population abundance		
Change in species diversity		
Effects on wildlife health (toxins, metals, etc.)		
Changes to migratory movement patterns		
Changes to predator-prey relationships		
Human-wildlife conflicts	X	Potential Impact(s): Human-wildlife conflicts Proposed Measure(s) to reduce impacts: All employees are trained in Bear Aware Training and given the necessary deterrents (bear spray and bangers). Employees are also trained to pay attention to the surroundings and not to harass wildlife. All food is to remain in the vehicle and garbage is to be disposed of in proper receptacles.
Other – Human/Machine - Wildlife Disruption	X	Potential Impact(s): Potential wildlife disruption due to exploration noise and activity, in particular South Nahanni Caribou and Grizzly Bear. Disturbance is seasonal while drilling, over five years, and within a small area of the herd range where there is some post-calving use. Calving and rutting areas are generally found outside of the proposed exploration area based on surveys conducted from 2007 to 2011, 2014, 2015 and 2019.  Proposed Measure(s) to reduce impacts: Stop work when animals are in the area and do not complete work(s) in known sensitive habitats.
<b>Aquatic Habitat</b>		
Breeding disturbances		
Change in species diversity		

<b>Potential Impacts</b> <i>Use an "X" to indicate which apply</i>	<b>X</b>	<b>Potential Project Impacts and Proposed Mitigations</b> <i>Describe the potential impact(s) and the proposed measure(s) to reduce each of these impacts.</i>
Effects on health (toxins, metals, sediment, etc.)	X	Potential Impact(s): Aquatic and terrestrial environments as well as human impacts. Proposed Measure(s) to reduce impacts: No work is to be completed within 30 m of the ordinary high-water mark. As well if there is a potential for mobilization of sedimentation the following will occur: 1) Relocate to another area. 2) If relocation is not possible install applicable silt fencing and other sediment mitigations. 3) If there still is the potential for sedimentation even after step 2, stop work in the area and proceed to identify alternatives.
Changes to migratory movement patterns		
Changes to predator-prey relationships		
Effects on population abundance		
Change in species diversity		
Other		
<b>CULTURAL COMPONENTS</b>		
<b>Wildlife Harvesting</b>		
Loss or reduction in game species populations		
Effects on traditional land use, subsistence, and harvesting rights		
Other		
<b>Cultural Integrity and Heritage Resources</b>		
Change to or loss of cultural integrity		
Change to or loss of traditional lifestyle		
Change to or loss of heritage resource		
Other		
<b>Social and Economic Well-being</b>		
Increased human health hazard and risk		
Economic opportunities or losses (employment, training)		
Change in ecological, cultural, social, or economic values identified for protection in approved Land Use Plans		
Impairment of the recreational or traditional uses of the land or water		
Impairment of the aesthetic quality of the land or water		

<b>Potential Impacts</b> <i>Use an "X" to indicate which apply</i>	<b>X</b>	<b>Potential Project Impacts and Proposed Mitigations</b> <i>Describe the potential impact(s) and the proposed measure(s) to reduce each of these impacts.</i>
Changes to the use of the area by other non-Indigenous people (e.g., trappers, outfitters, residents, hunters, forest harvesters, other authorized projects)	<b>X</b>	Potential Impact(s): Effects on Indigenous lifestyle Employment and business contract benefits. Proposed Measure(s) to reduce impacts: Increased income is not expected to cause significant adverse social effects. SCML will work with the Land Corporations to build the employment and business registry, help with training strategies, and maintain regular communication to help community members realize the benefits and help manage any adverse human resources or social effects.
Other		

### 18. CLOSURE AND RECLAMATION

Use the grey field below to provide or reference the following information:

**Closure and Reclamation Plan:** Include a Closure and Reclamation Plan in the Application Package, if applicable, or for small-scale projects, describe the proposed closure and reclamation activities in the grey field provided below. Describe any temporary closure(s) and seasonal shutdowns. Please also refer to the MVLWB/AANDC [Guidelines for the Closure and Reclamation of Advanced Mineral Exploration and Mine Sites in the Northwest Territories](#).

**Closure Cost Estimate:** Prepare a Closure Cost Estimate and include it in your Application Package. Applicants are encouraged to contact Board staff, prior to applying, to determine which closure-cost-estimate template is most suited to the activities being applied for. Guidance is provided in section 2.2 of the MVLWB/INAC/GNWT [Guidelines for Closure and Reclamation Cost Estimates for Mines](#). If the Application is submitted concurrently with a Water Licence Application, the estimate should include a breakdown of water- and land-related activities and liabilities.

Attachment 7 – Restoration Plan.

### 19. ADDITIONAL SUPPORTING INFORMATION

Use the grey field below to provide or reference the following information:

**Engagement:** Conduct engagement, prepare an Engagement Record and Engagement Plan in accordance with the MVLWB [Engagement Guidelines for Applicants and Holders of Water Licences and Land Use Permits](#), and include them in your Application Package. Templates are provided in the Guidelines. Please also refer to [Information for Proponents on MVLWB's Engagement Requirements](#).

**Land Use Plans:** Contact the applicable Land Use Planning Board or the Tłjchq Government to discuss conformity with the relevant land use plan(s). Include a Land Use Plan Conformity Table in your Application Package, demonstrating how the project meets the requirements of the Land Use Plan, if applicable.

Traditional (Environmental) Knowledge (TEK/TK): Provision of TEK/TK is mandatory for applications to the SLWB. Other applicants are strongly encouraged to include TEK/TK.

Studies Undertaken to Date: List any relevant studies that support the proposed activities and include them in your Application Package.

**20. FEES**

Refer to the Guide for assistance in determining relevant fees.

Type of Fee	Amount (\$)
Application fee (if applicable):	\$150
Land-use fees (for federal areas only):	
<b>Total Fees:</b>	<b>\$150</b>

**21. SIGNATURE**

Gabriel Guang Xue	Principal Geologist
Applicant’s Name (print) or Company Name	Position (print)

	2021 – 09 - 29
Signature	Date

Review the application package checklist provided in the Guide, and submit completed applications to the Regulatory Manager or Executive Director identified on the “Contact Us” pages of the respective Land and Water Board ([www.mvlwb.com](http://www.mvlwb.com), [www.wlwb.ca](http://www.wlwb.ca), [www.slwb.com](http://www.slwb.com), [www.glwb.com](http://www.glwb.com)).
