**Subject:** RE: Follow up on CGB Spill Contingency Plan Version 2.0

**Importance:** High

Hi Jessica,

Thank you for the discussion this morning to clarify this point.

Here is the text we will update for section 2.10.

### **2.10 PROCEDURES FOR HAZARDOUS WASTE AND FUEL TRANSFERS**

The Community Government will ensure that all staff that will be handling or transferring fuel or hazardous waste will be properly trained for the task they need to execute, as well as the required spill contingency training (see section 2.14). Proper PPE (safety glasses, boots, gloves, clothing) and spill-control kits (granular absorbents, pads, booms, disposal bags, etc.) will be available to staff in the event of a spill. Spills kits are available at various locations (table 8) and are readily available. Secondary containment units are to be used in case of emergency or during hazardous waste transfers. These preventive measures are to address any spills or chances of contamination to the immediate environment.

The Community Government will also complete appropriate waste movement documents when receiving hazardous waste and shipping any hazardous waste for final disposal in accordance with the *Transportation of Dangerous Goods Act* and with applicable provincial / territorial regulations.

Only those contractors/carriers who have had experience and are licensed to handle the type of hazardous waste and fuel (e.g. KBL Environmental Ltd, Midnight Petroleum) to be disposed of may be used for the transportation of hazardous waste and fuel. The hazardous waste shippers must identify, classify, safely package and label hazardous wastes. Movement documents (e.g. waste manifest) will be kept on hand for all situations where waste is being shipped.

Let me know if this clarifies and fulfills your requirements.  
If you need more information feel free to let me know.  
Once I hear back from you we will re-issue the entire plan.

Have a great day.  
Yannick

**Subject:** RE: Follow up on CGB Spill Contingency Plan Version 2.0

Hi Yannick,

Thanks for your quick response. Board staff recognize that there are various sections of the HWMP and SCP that speak to the transfer hazardous waste and spills, but are looking for the standard operating procedures for the transfer of fuel and fuel distillates before it spills (i.e., preventative measures such as fuel handling procedures).

I hope this provides further clarity. If BluMetric could respond by noon tomorrow, that would be fantastic!

As always, do not hesitate to contact Board staff if you have any questions.

Masi,

**Subject:** RE: Follow up on CGB Spill Contingency Plan Version 2.0

Hi Jessica,

The handling of fuel/fuel distillates is discussed in the Hazardous Waste Management Plan (Section 3.3). What is currently included in the Spill Contingency Plan on this topic is limited to the context of spill related hazardous waste.

We will revise the SCP to include a new section after 2.9 and title it "Procedures for Transfer of Hazardous Waste". This section will include both the procedure the CGB will follow and will specify the transport and disposal via a licensed waste disposal contractor.

Let me know if you have any questions, we will resubmit the SCP by next week.

Thanks  
Yannick

**Subject:** Follow up on CGB Spill Contingency Plan Version 2.0

Hi Yannick,

Board staff are following up with BluMetric on Version 2.0 of the Spill Contingency Plan for the Community Government of Behchokq (CGB). In the revision history table, it says that throughout the Plan, CGB/BluMetric describes the standard operating procedures for the transfer of hazardous materials. Board staff note that section 2.11.6 describes the procedures for transferring, storing, and managing spill-related Waste, but could not locate where the Plan describes hazardous materials (i.e., fuel). Could BluMetric point out where this information is provided in the Plan? If not included, please describe the Standard Operating Procedures for the transfer of fuel/fuel distillates/etc.

If BluMetric could respond to Board staff by end of day Thursday, that would be great.

Masi,
