To all parties,

**Re: Information Requests Resulting from Community of Behchoko's Technical Session (Water Licence Application # W2014L3-0002)**

The Wek'èezhii Land and Water Board (WLWB) would like to thank all parties who participated in submitting comments and responses and attending the recent technical sessions to discuss the Community Government of Behchoko's (CGB) Water Licence application. The session was beneficial in helping to identify and clarify several issues raised by reviewers and Board staff, and have hopefully contributed to a better understanding of the information on the record, as well as each party's position.

There were several requests for specific information and numerous commitments to provide information made by parties during the technical session. In an effort to ensure an adequate level of evidence is on the record for this proceeding, which will allow parties to make informed submissions to the Board and allow the Board to make an informed decision, the WLWB is requesting the following information no later than July 30, 2014:

**IR#1 – for CGB/consultants**

Volumes of sludge generated from the Water Treatment Plant

**IR#2 – for CGB/consultants**

Characterization of sludge from the Water Treatment Plant

**IR#3 – for CGB/consultants**

Plan for management of honey bag pit (which will eventually be incorporated into the Wastewater Treatment Facility Operations and Maintenance Plan)

**IR#4 – for CGB/consultants**

Confirm threshold amount for when sludge is to be dredged from lagoons

**IR#5 – for CGB/consultants**

Confirm whether topographic data of the Rae and Edzo wetlands are available, and if so, calculate hydraulic retention times and loading rates

**IR#6 – for MACA**

Provide Public Works records on historic sampling at Frank's Channel and records of daily sampling conducted by MACA in early 1990s (cell 1 breach) if available

**IR#7 – for CGB/consultants**

Provide map identifying proposed Surveillance Network Program (SNP) location at the end of Rae wetland prior to entering Frank’s Channel

**IR#8 – for CGB/consultants**

Provide implementation schedule for the closure of the existing landfill and the transition of the new landfill

**IR#9 – for CGB/consultants**

Provide, with rationale, proposed surface water monitoring locations for SNP stations for the new landfill

All information regarding this proceeding will be posted on the WLWB’s online registry and Board staff will post IR responses in a timely manner, as they are submitted. If you have any questions please contact Sarah Elsasser at [selsasser@wlwb.ca](mailto:selsasser@wlwb.ca) or at 867-765-4583 or Ryan Fequet at [rfequet@wlwb.ca](mailto:rfequet@wlwb.ca) or 867-765-4589.

Masi,

Sarah Elsasser  
Regulatory Specialist, WLWB
