**Re – Notice to interested parties of GGL Resources Corp. proposed request for an Extension to Land Use Permit W2015C0003. Mineral exploration in the Courageous Lake - Lac de Gras area, NT.**

### **Introduction**

This letter is for the purpose of informing you that GGL Resources Corp. intends to request a 2 year extension to Class 'A' Land Use Permit W2015C0003. The permit covers exploration activities on the Company's Bishop and Starfish properties located in the Courageous Lake – Lac de Gras area approximately 260 kilometers northeast of Yellowknife, NT. There is no proposed change to the Scope of the Permit.

### **Project Description**

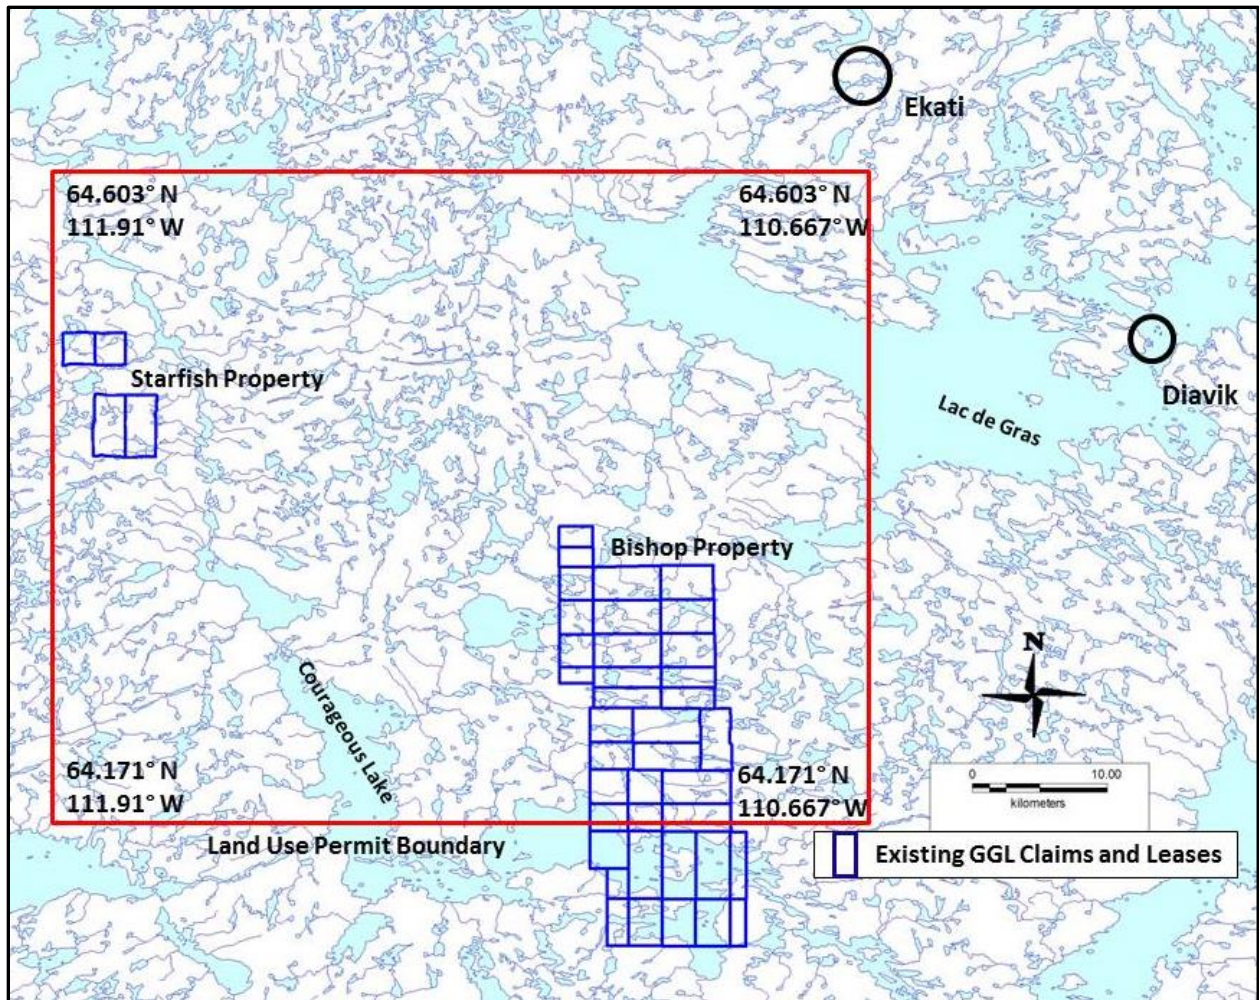

The Bishop and Starfish projects, located approximately 260 kilometers NE of Yellowknife in the Courageous Lake – Lac de Gras area currently consist of 37 mineral claims and 5 mineral leases totalling 33,885 hectares. The discontinuous claims and leases are considered to have the potential to host economic quantities of diamond. See attached map for project locations.

### **Status of Land Use Operations**

The projects have been mainly dormant during the Land Use Permit period receiving only 1 brief exploration program at the Bishop project consisting of ground geophysics. Attached is a Company news release describing the 2018 program and results at the Bishop property. The news release also refers to another project, Rhombus, which is not associated with this Letter.

### **Schedule of Activities**

The schedule of activities for the requested 2 year extension are unknown at this point. Any activities will be financing dependant which the Company cannot predict. Should funding be available it is possible that ground geophysics and/or till sampling could be undertaken. If results warrant then follow up drill testing may occur. Any exploration activities will be within the current Scope of the permit.

### Project Location and Land Use Permit Boundary

The boundaries for the current Land Use Permit are between 64.171° N to 64.603° N latitude and 111.91° W to 110.667 W longitude.

If you have any questions or concerns please feel free to contact me for additional information.

Sincerely,

David Kelsch
