Hi Joe,

The Processed Kimberlite Containment Facility (PKCF) remains in a normal state.

The PKCF Trigger Action Response Plan (TARP) condition/status for the NW Decant Water Elevation remains steady at GREEN condition with NW Decant Pond water level of 467.27 m (it was 467.46 m in the last report).

Pond 3 water elevation TARP status is GREEN at 424.46 m (it was 424.48 m in the last report), with approximately 134,000 cubic meters of remaining capacity up to the 427.4 m elevation above which is required to store the Inflow Design Flood (IDF).

Cheers,
Kofi
