Dear Mr. Nick Thomas,

Re: North Arrow Minerals Inc. – Land Use Permit – Final Plan Request – Mineral Exploration – Lac de Gras, NT

According to the Wek'èezhì Land and Water Board (Board) records, Land Use Permit W2017C0001 (Permit) for the Loki Project at Lac de Gras, NT (Project) will expire on March 1, 2024.

As per subsection 26(6) of the Mackenzie Valley Land Use Regulations (MVLUR), no further extensions to the term of this Permit will be considered.¹ Site restoration, clean up, and removal of equipment, materials, buildings, etc. must be completed before the Permit expires.

Should additional time be required to complete the Project, refer to the Land and Water Board (LWB) *Guide to the Land Use Permitting Process*² for more information on applying to renew a land use permit.

A final plan must be submitted to the Board within 60 days of the expiry of the Permit, as per section 29 of the MVLUR. The final plan must include:

1. A map, normally at a scale of 1:50,000, showing the location, area, and distances of all Project activities. All maps must have the north indicator, scale, and coordinates clearly marked;
2. GIS data, if available;
3. A summary of the hectares utilized in each aspect of the Project; and
