Subject: RE: RTX Exploration Program - Notice of Additives

Good Day Ms. Lyon,

Thank you for the below email notification regarding the use of drilling additives, with the corresponding Material Safety Data Sheets (MSDS), to be used during the 2020 summer drilling program. It must be noted that calcium chloride was previously used without notification to either the Wek'eezhii Land and Water Board (the Board) or the Resource Management Officer (Inspector) during the 2020 winter drilling program.

Condition 32 of Land Use Permit W2017C0002 states the following;

The Permittee shall not use any Drilling Fluids, muds, or additives that were not identified in the complete application, unless the MSDSs are provided to the Board and Inspector and usage of the chemical(s) is authorized in writing by the Board.

Please ensure that in the future all chemicals and corresponding MSDSs are provided to both the Board and Inspector, as per the conditions of the Land Use Permit.

Kind regards,

Tom Bradbury

Good morning Kassandra and Anneli,

Please find attached a letter informing the Board of drilling additives, with their corresponding SDSs, to be used on the 2020 summer drilling program. In addition to cc'ing my DDMI colleagues for their information, I have also included Tom Bradbury, the GNWT Lands Inspector, so as to comply with the relevant section of the LUP.

Any questions, please let me know.

Take care,
Eileen
