Dear Ms. Francis & Ms. Jokela:

**Re: RTX Exploration Drilling at Diavik Progress Report**

---

Following Condition 8 of the Land Use Permit W2017C0002, namely;

*The Permittee shall submit a progress report to the Inspector and the Board every month during which there is an active drill program.*

we wish to inform you of the progress of our drilling program.

The Downing Duralite 250B drill already located at Diavik Diamond mine from the fall program began drilling on March 11<sup>th</sup>, 2020. Since that time it has completed 3 drillholes. The following table is a breakdown of the collar coordinates (NAD83 UTM 12N), dip, azimuth and drilling distances that were completed on each hole.

Target	X	Y	Azimuth	Dip	Distance Drilled	Dates Drilled
A537	543350	7152020	270°	70°	115m	March 11 - 20
T7W	547090	7147792	0°	90°	76.5m	March 24 - 25
T7W	547089	7147916	200°	60°	132m	March 26 - 29

Mobilization from Diavik to each target location, and between targets, was completed using Acasta HeliFlight's AS350B3 and Bell 407 helicopters. The drill is currently being moved to the fourth drill location, details of which will be reported next month.

At present, we only have pictures A537 following demobilization of the drill. The photos for the remaining 2 sites that were completed this month will be taken in the coming days and included in April's monthly progress report.

**Figure 1:** Left picture is bird's eye view of A537 site (red circle)

**Figure 2:** Above picture taken from ground of A537 site.

Should you have any questions or concerns, please do not hesitate to be in touch.

Sincerely,

A handwritten signature in black ink, appearing to be 'E. Lyon'.

Eileen Lyon  
Principal I Geoscientist  
Project Manager for Diavik Brownfields
