Reference: 144902412 Gamèti Water Treatment Plant – W2018L3-0001

As per the request from the Wek'èezhii Land and Water Board, on behalf of the Community Government of Gamèti and the Government of the Northwest Territories in association with AWC Water Solutions, we provide the requested Operations and Maintenance Plan Version 3.0 for the Boards approval.

Much of the items from the Boards review and decision regarding the new WTP as detailed in the letter from Joe Mackenzie dated July 2, 2019 revolves around concerns of the backwash water. Although the O&M Plan addresses and clarifies these items fully, a short form memorandum (AWC – New Gameti Water Treatment Plant Backwash Water Quality dated June 27th, 2019) has been prepared that addresses these items concisely.

We look forward to the Boards review and further discussions for approval of the new WTP.
