JUN 15 2020

Dear Mr. Mackenzie:

Tłıchọ All Season Road Type A Water Licence Application Package

The Government of the Northwest Territories' Department of Infrastructure (GNWT-INF) is pleased to submit an undated Engagement Records for a Type A Water Licence (WL) Application for the Tłıchọ All Season Road (TASR). The Type A WL Application was submitted on May 13, 2020, however, the Wek'èezhì Land and Water Board (WLWB) deemed the application incomplete as indicated in the WLWB's letter dated June 2, 2020. In response to the letter, additional follow-up calls were made and emails sent to affected parties on June 3-4, 2020. Attached is an updated version of the Engagement Records, including email responses provided by interested parties to follow-ups on May 27, 2020.

Tłıchọ All Season Road is currently operating under Land Use Permit W2016E0004 and Type B Water Licence W2016L8-0001. The Type A Water Licence will allow for water withdrawal to support construction activities such as road compaction, dust suppression, winter road construction, and camp use. The water withdrawal is expected to start on July 1, 2020. Further details are included in the attached documents.

The Engagement Record has been updated to provide details of engagement undertaken to inform the affected parties of the Type A Water Licence Application. Should you have any questions or concerns please contact me at (867) 767-9086 ext. 31117 or by email at Ziaur_Rahman@gov.nt.ca at your earliest convenience.

Sincerely,

Ziaur Rahman
Manager, Surface Design and
Construction
Department of Infrastructure

Hello Clint

We have been asked by the WLWB to bolster our engagement documentation in support of this Water License application prior to their formal review. In response to the application information package sent to you in mid-February we hope that you could respond to this email (reply all) as soon as possible with any comments, concerns, questions or endorsement for our engagement records.

Thanks in advance

Subject: TASR- Type A Water License - Engagement

Hello Everyone,

Please see the attached letter which I am providing to you to make you aware that North Star Infrastructure will be submitting a Type A water Licence application. The proposed Type A Water License seeks approval to use 900 m3/day, up from the currently approved 299 m3/day volume in INF's Type B Water License. The additional water volume is required for compaction of roadway embankment material and gravel placement compaction, scheduled for 2020 and 2021, and general day-to-day dust suspension needs on our haul roads. INF's current Type B Water License volume of 299 m3/day is inadequate for our projected 2020 and 2021 demand.

I have attached a summary (and map) of the 15 already-approved water borrow sources, taken from the Project's Fish and Fish Habitat Protection Plan (FFHPP). These sources were approved per the current Type B Water License and will be the same for the proposed Type A Water License.

Kind regards,
Caroline

Hello,

Environment and Natural Resources (ENR) received NSI's February 19, 2020 email (attached) stating NSI's intent to apply for a Type A Water Licence to increase water use from 299m³/day to 900m³/day through the use of water sources that are currently approved under INF's Type B Water Licence. ENR did not request additional information on the proposed application.

ENR expects that INF will ensure that the existing water sources can support the water withdrawal amounts proposed by NSI/INF.

Importance: High

Hello Michael

We have been asked by the WLWB to bolster our engagement documentation in support of this Water License application prior to their formal review. In response to the application information package sent to you in mid-February we hope that you could respond to this email (reply all) as soon as possible with any comments, concerns, questions or endorsement for our engagement records.

Thanks in advance

Dave
