Project	Point Lake – Amendment Application for W2020L2-0004 and new Applications for W2021X0004 & W2021D0005
Location	Lac de Gras, NT
Activity	Mining and Milling
Date of Work Plan	December 6, 2021
Work Plan Version	Version 4

Purpose of the Work Plan

To outline the processes and timelines to be followed for this regulatory proceeding.

Background

On May 31, 2021, the Arctic Canadian Diamond Company Ltd. (Arctic) submitted an application to amend Water Licence W2012L2-0001 (Licence)¹ and two complete applications for Type A Land Use Permits (Permits)^{2, 3} for the Ekati Diamond Mine Point Lake Project to the Wek'èezhì Land and Water Board (Board). On June 2, 2021, the Applicant submitted additional information as requested, and on Jun 10, 2021, the Application Package was deemed complete.

Scope of the Project

Arctic is proposing to fish-out and dewater Point Lake to allow for open pit mining of the Point Lake Kimberlite Pipes. This would include installation of dewatering infrastructure, construction of a waste rock storage area, installation of minewater pipelines, construction of roads, construction of a utility area, and open pit mining. Once the area is mined, Arctic will then conduct closure and reclamation including covering of the WRSA, flooding of the Point Lake open pit, and reclamation of remaining site infrastructure.

Guiding Principles

The following principles will guide the Board's regulatory proceeding:

- The Board will carry out the regulatory proceeding in a timely manner and in accordance with the Boards' *Rules of Procedure*;
- The Board shall consider the impacts of the proposed Project on and the importance of conservation to the wellbeing and way of life of the Indigenous peoples of Canada (section 35 of the *Constitution Act, 1982*);
- The Board will review the Application Package and develop the licence and permits based on the evidence and rationale submitted by the Applicant and other Parties; and
- The Board will develop the licence and permits in accordance with the Board's mandate and applicable policies to ensure protection of the environment and, where possible, consistency in decision-making throughout the Mackenzie Valley.

Work Plan Objectives

The Work Plan objectives are to:

- Compile a broad range of input through the review process;
- Ensure adequate information is gathered to complete the Board's regulatory proceeding; and
- Facilitate a thorough, inclusive, and timely regulatory proceeding.

Opportunities for Community Engagement

- The Board requires the Applicant to engage with potentially affected parties – including communities and Indigenous organizations and governments – regarding the Application Package prior to submission;
- The Board will distribute the Application Package for public review using the LWB Online Review System (ORS) and will place a notification(s) regarding the review process in the newspaper;
- The Board will coordinate a technical session to address specific issues that require more focused review and discussion;
- The Board will hold a public hearing and will place a notification regarding the hearing in the newspaper; and
- The Board will hold any other consultation or engagement activity that the Board considers appropriate.

Regulatory Proceeding Timelines

Subsection 47(1) of the *Waters Act* requires the Board to make a decision on a water licence application within a period of nine months after the day on which an application is deemed complete and the review process begins. Based on section 28 of the *Federal Interpretation Act*, this is equivalent to 275 calendar days. The Board's day count stops whenever the Board requires the Applicant to provide information for the regulatory proceeding to continue (signified by the red shading in the table below). Once that information has been provided, the Board's day count resumes (signified by the green shading in the table below).

The Work Plan table below sets out the main process steps and indicates the responsible Party and the anticipated completion date for each item. Significant milestones are indicated in bold text.
