Re: Request for Name Assignment and Amendment to LUP W2022C0004

Dear Mr. Mantla,

Northern Critical Minerals (NCM) is pleased to be submitting this attached request for name assignment and condition amendment to the Land Use Permit (LUP) W2022C0004 for the Tharsis Project in the Squalus Lake area.

Reasons for the Requested Changes

The reason for the change in name assignment is because NCM has assumed indefinite operational control of the project. The reason for the amendment to the conditions is because five additional mineral claims have been staked adjacent to the original mineral claims. We would like to emphasize that the scope of work remains unchanged from the original application, such as that there is no additional equipment or volume of fuel planned. Furthermore, given that there are no changes to the proposed camp, regulated/hazardous materials, hydrocarbon storage and transfer, land disturbance, or equipment, the final security determination remains unchanged and an updated closure cost estimate from the original application is not warranted.

Summary of Requested Changes

1. Change of Permittee

- a. Originally Voyageur Exploration Ltd. of 2611 Elliott Drive, Regina, SK, S4N 3H8;
- b. Requesting to change to Northern Critical Minerals Corp. of 5107 – 53rd Street, Yellowknife, NT, X1A 2R2.

2. Condition 26(1)(a), Category 1

- a. Originally the location of activities was on claims THARSIS 2 and THARSIS 3;
- b. Requesting to change the location of activities to claims THARSIS 1 to THARSIS 7.

Potentially-Affected Party Engagement

NCM has followed the Pre-Submission Engagement Process, and notified all parties potentially-affected by the potential work done at the Tharsis Property that a request will be made for a Name Assignment and Condition Amendment to the LUP. Parties were notified that the scope of work will not be altered, and a property-scale map was provided to help give context to the proposed conditional amendment.
