**Re: Authorization for Road Watering and Discharge water from King Pond Settling Facility to Cujo Lake**

Dear Mr. Liu,

This letter is in response to the requests submitted by Arctic Canadian Diamond Company Ltd. (Arctic) on June 22<sup>nd</sup> 2024, seeking authorization to commence discharge of water from The King Pond Settling Facility to Cujo Lake, and use of water from King Pond for road watering.

The Inspector has reviewed the Bureau Veritas Lab results (R3517433) submitted from a water sample collected by Arctic at SNP Station 1616-43 on June 16<sup>th</sup>, 2024. It has been determined that the water sample results meet the defined water quality requirements as set out in Part H, Condition 26(b) of Water Licence W2022L2-0001.

Conditional authorization is hereby granted under Part H Items 22 of Water Licence W2022L2-0001 to proceed with the pumping of water from King Pond to Cujo Lake, and use for road watering.

This authorization is subject to the following conditions:

- Daily erosion inspections are required at the discharge point into Cujo Lake. Records of inspections are to be kept for review at the request of an Inspector. If erosion is observed, the Licensee shall immediately notify an Inspector and take action to mitigate the erosion problem
- Water sampling will be conducted as per the Surveillance Network Program
- The monthly and annual quantities of water discharged from the King Pond are recorded and listed in the monthly SNP report, and Annual Water Licence Report

No other use of this water is authorized.

Trusting this is satisfactory. If you have any questions or concerns about this decision, please contact the Inspector at (867)-447-0184.

Sincerely,

Jamie Steele  
Manager-Diamond Resource Management
