Dear Robert:

Re: Final Report – Willow River Source 467

A total of 4920 cubic meters of gravel was extracted from Source 467 at Willow River. The haul started on March 26, 2005, and was closed on April 22, 2005.

Attached you will find a map depicting the area and amounts extracted. I trust that this will suffice as a final report for the project.

Thank you for your cooperation and support on this project.

Yours truly,

Knute L. Hansen  
Band Operations Officer
