Subject: RE: [EXTERNAL] - Requests for Well Program Information

Hi Kristen

Obsidian is requesting an extension to January 29th for the final submissions for ACW for both ACW-2019-006-OBS-WID1907 and ACW-2019-007-OBS-WID1860. We are having issues getting the final reviews completed with office restrictions for our consultants.

Thanks in advance
Craig

Good afternoon

As discussed in our phone call earlier this week, Obsidian will submit our complete ACW for both well before January 8th, 2021.

Have a good weekend

Thanks

Craig Langford

Subject: RE: [EXTERNAL] - Requests for Well Program Information

Good afternoon Craig,

OROGO would like to take you up on your offer to have a call.

It should provide the opportunity to discuss your intentions for these wells, as well as what our regulatory expectations are.

Keep in mind, these well approvals are currently in the application process so OROGO will not be able to provide specific approvals/ decisions during the meeting but, I think we can have a meaningful conversation to develop a path forward.

Would you and Shaun be available to have a call with Peter Lennie-Misgeld (Senior Advisor, Policy and Legislation), Brian Heppelle (Senior Technical Advisor) and myself on the afternoon of December 7, 2020 or on December 8, 2020?

If so, please advise of the best available times, Shaun's email and we will set up a meeting.

Subject: RE: [EXTERNAL] - Requests for Well Program Information

Hello Craig –

OROGO is proceeding with both ACW applications from Obsidian (for the C31-A and K-32 wells), based on your email of October 9 (below) indicating that the additional information submitted for the OA application was also meant to be submitted for the ACW applications.

On November 24, OROGO issued information requests for both applications.

Obsidian has not yet responded to the information request for the C-31A well (the deadline for response was December 1).

Obsidian did respond to the information request for the K-32 well on December 1, but indicated that additional information would be provided today, December 3. Once we receive the additional information for the K-32 ACW from Obsidian, we will continue our review.

Please let us know when Obsidian plans to start operations on the K-32 well so we can keep that in mind when reviewing Obsidian's response to the information request.

Thanks,
Pauline

Good Afternoon

Obsidian is inquiring about the response submitted below regarding K32 and if OROGO is in agreement or has concerns? If agreed, Obsidian would like to submit the ACW and request a prompt response if possible to allow the option of completing the work on K32 prior to the end of December 2020. If agreed, we can have the ACW submitted tomorrow for approval or if there is some discussion required, please contact Shaun Nolan at (403) 801-1894.

Thanks in advance

Craig

Good Afternoon

Please accept the response below to the well program request dated September 22nd, 2020 from OROGO regarding both the Obsidian K32 and C31 wells.

Obsidian confirms that the well program applications previously submitted in September of 2019 were intended as part of Obsidian's ACW application and not solely in support of the OA. At the time of submission, Obsidian anticipated our OA application to be approved based on the smaller scope of our program with some practical application to allow Obsidian to obtain the ACW and move forward with the actual work required.

Obsidian was informed that a ACW can't be approved until the Operating Authorization is obtained and therefore did not move forward with any additional submissions for the ACW. Obsidian intends to submit the additional information required for the ACW once the OA is approved.

Regards

Craig Langford
