November 28, 2023

Dear Jonathon Michel:

**Information Request No. 4:  
Pressure Testing (ACW-2023-AC-G-04-WID1915 variation 1)**

On October 16, 2023, Canadian Petroleum Engineering Inc., consultants to Aurora College, provided a schedule of operations for the abandonment of the Aurora Training Well G-04 (WID1915) in compliance with term 11 of ACW-2023-AC-G-04-WID1915. The schedule indicated that the wellhead and casing would be pressure tested on November 20, 2023.

On November 24, 2023, Mike Martin, the Chief Safety Officer and Chief Conservation Officer, emailed Aurora College and Canadian Petroleum Engineering Inc. to confirm whether the testing had occurred, as the Office of the Regulator of Oil and Gas Operations (OROGO) had not received a Daily Report for the operation (Daily Reports are required under term 13 of ACW-2023-AC-G-04-WID1915; term 11 of ACW-2023-AC-G-04-WID1915 variation 1). Mr. Martin asked for a response by 1600h on November 27, 2023.

No response has been received.

Please provide the following information by 1600h on Friday, December 1, 2023:

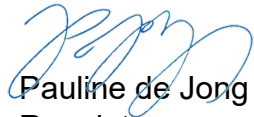

1. Confirm whether the wellhead and casing pressure testing occurred as scheduled on November 20, 2023.
2. If yes, submit the Daily Report for this activity and the results of the pressure testing.
3. If no, identify when the pressure testing will occur.
