Re: Well Approval for the Abandonment of the Aurora College Training Well G-04  
Application ACW- 2023-AC-G-04-WID1915

Dear Ms. de Jong

Canadian Petroleum Engineering on behalf of Aurora College has received and reviewed the Approval for ACW - 2023-AC-G-04-WID1915. We appreciate all of the support which you have provided through the approval process.

In accordance with the terms attached to the ACW, we would like to update you on our plans for undertaking the well abandonment of the Aurora College Training Well G-04. Aurora College proposes to commence the program on March 7, 2024 and will clear the location of snow on that date. We intend to commence operations on March 8 when we will steam the wellhead and casing to conduct the initial pressure test on the casing.

Our operations timing is being determined in part by the IPC Inuvialuit Energy Security Project as we will be sharing services with the IPC's program in Tuktoyaktuk. Aurora College will be able to utilize equipment and services when they are not required on the M-18 well completion, and that the IPC program needs have priority over Aurora College's operational needs.

In accordance with the terms attached to ACW - 2023-AC-G-04-WID1915, the updated operator list is attached to this letter.

Aurora College will also include the updated operator contact list in a final revised well abandonment program for the Aurora College Training Well G-04 which incorporates all of the information and changes which Aurora College has made to the abandonment program as a result of our agreement with IPC. The final well abandonment program also

includes a revised project schedule for your review. This program will be submitted to OROGO by March 4, 2024.

CPE will provide additional information as required.

Sincerely

Lorne Hammer  
President, CPE
